6/6/2007. Paul Smith of LPFD informed me of groundwater extraction at the site. He was concerned that discharge from well could be vandalized or disturbed resulting in a discharge to storm drain. I called Abhik Dutta of Delta 408-826-1869 and asked several questions regarding the groundwater extraction and storage on site. They are purging 48,000 gallons as part of batch extraction. Will have a person checking the discharge once per week. I asked that they increase checking to twice per week. I sent an email confirmation on 6/12/2007.

9/11/2007. Spoke with Paul Smith of LPFD. He received a complaint from Karen Downs 925-896-2046 or 846-2046. I described Draft CAP required on October 3 and then public participation. She is concerned about appearance of site with tank and fences. May give me a call regarding status of cleanup at site. If I do not hear from her then I may call her.

Drogos, Donna, Env. Health
