

Exxon  
2991 Hayward Rd  
Pleasanton

Exxon meeting:

11/13/96

Stephen Cusenza - City of Pleasanton

Richard Munsch, Keoni Almeida - Delta

Thomas Elson - Luhdorff & Scalmanini

Roger Hicks - Exxon

We met to discuss the threat to Muni Well #7 from the Exxon plume. The city feels well #7 is at risk based on the periodic appearance of fuel HCs in deeper water zones monitored by Exxon wells MW-5D and MW-8. The city feels well #7 must not be placed back into service, but, rather replaced in an area where it will not be at risk. The City discussed Exxon's role in participating in the costs of replacement, pegged at between ~ \$600-800K. We also discussed what future actions may be required of Exxon in the event that the "sensitive receptor" posed by well #7 is removed, or not.

Exxon will be discussing the issues in their camp, and then with the City. I will be involved on the periphery.
