MEMO to file:

Ed Ralston (Unocal) called today to inform that during last weeks sampling efforts for the Unocal wells, two (2) of the GW VOA sample bottles were broken. I requested Unocal direct the consultant to return to the site ASAP to resample. He said he will have them return to the site this week.

Additionally Mr. Ralston said he expected a fairly quick approval for the access to the Shadrall property. I said that sampling those wells next quarter would be appropriate. I also said the Shadrall wells may require redevelopment before they are suitable for use.
