

Chevron #8-8139
16304 Foothill Blvd
San Leandro

MEMO to file:

7/10/91

I spoke with Kyle Flory today regarding the site investigation remediation. Kyle is with CHEMPRO, Chevron's consultant on this site. He indicated the additional well planned for the Foothill Blvd median strip (mw-9) was installed June 10, and preexisting mw-4 and -5 were decommissioned June 11, and retrofitted as 4" extraction wells. No chemical data was available from samples collected on or around June 23, 1991.
