Mr. Thomas Bauhs  
Chevron Products company  
P. O. Box 6004  
San Ramon, California 94539

Subject: Addendum 1 to GR Report #346461.05-2, Work Plan for Off-site Monitoring Well Installation at Chevron Service Station #9-8139, 16304 Foothill Boulevard, San Leandro, California.

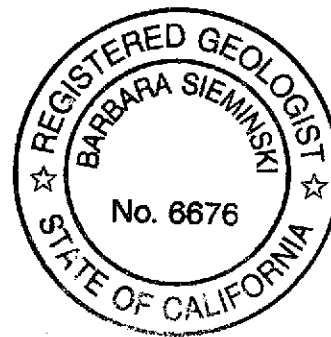

Mr. Bauhs:

At the request of Chevron Products Company. (Chevron), Gettler-Ryan Inc. (GR) has prepared this addendum for installation of an additional off-site groundwater monitoring well at the above referenced site. One additional off-site groundwater monitoring well (MW-14) will be installed in addition to two wells (MW-12 and MW-13) proposed in GR's original work plan for this site (GR Report #346461.05-2, dated March 17, 2000). This additional well was requested by the Alameda County Health Care Services Agency (ACHCSA) in their letter to Chevron dated April 25, 2000. Wells MW-12 through MW-14 will be installed along the southwestern side of Foothill Boulevard to delineate the extent of methyl tertiary butyl ether (MtBE) impact downgradient of the site. Proposed well locations are shown on the attached Site Plan. Well MW-14 will be installed, surveyed, developed, and sampled in accordance to the procedures described in Tasks 1 through 5 in GR's original work plan for off-site well installation.

If you have questions regarding this Addendum 1 to Work Plan, please call us in our Dublin office at (925) 551-7555.

Sincerely  
Gettler-Ryan Inc.

Barbara Sieminski  
Project Geologist  
R.G. No. 6676

Stephen J. Carter  
Senior Geologist
