Scott,

Thanks for the update. Good work on the wells. Probably one of the best records (!) on finding wells we "know" are probably there, but don't know about them. Documenting if they have two well boxes as you mentioned, would go a good long ways in demonstrating they are only used for irrigation (but doesn't wrap up potential exposure up completely).

Mark:

I believe this project (well sampling) was moved to October 19th, on the same day, we will be doing Geoprobng onsite per the recent work plan, once I get the drilling permit approved.

Last weekend I sampled two additional water wells, bring the total water well offsite samples collected to six.

Scott

Dear Mr. Detterman:

Please be advised that Stratus Environmental, Inc. will be conducting groundwater monitoring and sampling activities on October 11, 2016, for the Former Olympic Station site, located at 1436 Grant Avenue in San Lorenzo, California. If you have any questions or concerns, please feel free to contact Scott Bittinger at (530) 676-2062.

Sincerely,

Jennifer Delgado
