Scott,

I'm not sure where the hiccup occurred, but here is a copy; but likely you've already downloaded it from Geotracker. I will also forward separately to Mr. Jaber. I am guessing he also did not receive a copy.

A six week extension would be fine. I'll update Geotracker with the following revised dates:

System Evaluation / Remediation Monitoring Plan – December 31, 2015

Site Investigation – January 15, 2016

I don't think you'll need an extension for the groundwater monitoring? If so, let me know.

Mark:

I have just reviewed your October 5th letter for this site. The letter was never distributed to Gowri & I, so we were unaware that you had completed your review of this.

Given this situation, we are going to need extensions for all of the work tasks listed in the letter. Can you push the deadlines back about 6 weeks for all tasks?
