Duration: 0 hours

Received call from David Floren junior attorney for bankruptcy filing. Seeking to clarify value of property, with understanding of USTCF and reimbursement funding. This in followup to a phone call about a week ago. There are two claims on Geotracker, why? Had not noted before, called site up and see that one is over \$1M, the other much less, suspect may be related to two different generations of USTs, but do not actually know. Recommend he call the USTCF for their reason to accept both claims. Mention that the \$50k in funding now available to active sites would be lowered for this site due to USTCF recommendation for closure. This decreases it to \$10K per year, until their recommendation goes before their Board for consideration. We would argue they are not protecting public based on reasons in our letter, and that they are not using funds moneys wisely due to lack of appropriately full investigation. This area is documented to have a number of residential wells, with an above average number not registered with the state. Discuss how one achieves RP-ship, based on four definitions set by state, first of which is site ownership, so a bankruptcy would engender new ownership, and responsibility.
