File No. 12-99-702-SI

Mr Mehdi Mohammadian
919 Stagi Court
Los Altos, California 94024

SUBJECT: DECOMMISSION OF WELLS ON THE PROPERTIES

Located at 15595 Washington Avenue, 15568 & 15580 Lorenzo Avenue, and City of San Lorenzo Right Away on Lorenzo Avenue, in San Lorenzo, California

Dear Mr. Mohammadian:

Per your request and authorization, Enviro Soil Tech Consultants (ESTC) has completed decommission of wells on the properties located at 15595 Washington Avenue, 15568 & 15580 Lorenzo Avenue and City of San Lorenzo Right Away on Lorenzo Avenue, San Lorenzo, California (Figure 1).

After obtaining decommission and encroachment permits from the Alameda County Public Works Agency-Water Resources Section (ACPWA-WRS), Isotech Environmental Corporation (IEC), a C57 license contractor, decommissioned ten 2-inch groundwater monitoring wells (MW 1 through MW-5 and STMW-6 through STMW 10) on May 29, 2018 by pressure grout.

In addition, as per directive of Mr. Eneyew Amberber of (ACPWA) for specific well closure, IEC retained Cascade Drilling LP (Cascade), a C57 license contractor, to drill out the top 5-feet of monitoring wells (STMW-6, STMW-8 and STMW-10) on Lorenzo Avenue of City of San Lorenzo Right Away on August 17, 2018. All the work was supervised by Enviro Soil Tech Consultants (ESTC) and oversees by ACPWA's inspector, Mr. Eneyew Amberber.

All the wells were decommissioned in accordance with the ACPWA-WRS's guidelines and regulations for well decommission. The wells MW-1 through MW-5, STMW-7 and STMW-9 were pressure grouted with neat cement and sealed with 6-inches of concrete by IEC, and wells STMW-6, STMW-8 and STMW-10 were pressure grouted then 5-feet of top were drilled out and backfill with neat cement and sealed with 1-foot of concrete. Since all the wells were pressured grouted to the surface therefore, no waste was generated for disposal except cement bags that were disposed in recycling bin at the site, and drill cutting from wells STMW-6, STMW-8 and STMW-10 which was stored at the back of the property in the landscape area.

Enclosed please find the following exhibits: site vicinity map, site plan, well destruction permits and DWR's well completion reports submittals.

If you have any questions or require additional information, please feel free to contact our office at 408-297-1500 or via email at info@envirsoiltech.com.

Sincerely,

ENVIRO SOIL TECH CONSULTANTS

VICTOR B. CHERVEN, Ph. D.

Specific Work Permit Conditions

1. Drilling Permit(s) can be voided/ cancelled only in writing. It is the applicant's responsibility to notify Alameda County Public Works Agency, Water Resources Section in writing for an extension or to cancel the drilling permit application. No drilling permit application(s) shall be extended beyond ninety (90) days from the original start date. Applicants may not cancel a drilling permit application after the completion date of the permit issued has passed.
2. Prior to any drilling activities, it shall be the applicant's responsibility to contact and coordinate an Underground Service Alert (USA), obtain encroachment permit(s), excavation permit(s) or any other permits or agreements required for that Federal, State, County or City, and follow all City or County Ordinances. No work shall begin until all the permits and requirements have been approved or obtained. It shall also be the applicants responsibilities to provide to the Cities or to Alameda County an Traffic Safety Plan for any lane closures or detours planned.
3. Compliance with the well-sealing specifications shall not exempt the well-sealing contractor from complying with appropriate State reporting-requirements related to well construction or destruction (Sections 13750 through 13755

Alameda County Public Works Agency - Water Resources Well Permit

(Division 7, Chapter 10, Article 3) of the California Water Code). Contractor must complete State DWR Form 188 and mail original to the Alameda County Public Works Agency, Water Resources Section, within 30 days. Include permit number and site map.

4. Permittee shall assume entire responsibility for all activities and uses under this permit and shall indemnify, defend and save the Alameda County Public Works Agency, its officers, agents, and employees free and harmless from any and all expense, cost and liability in connection with or resulting from the exercise of this Permit including, but not limited to, property damage, personal injury and wrongful death.

5. Applicant shall contact assigned inspector listed on the top of the permit at least five (5) working days prior to starting, once the permit has been approved. Confirm the scheduled date(s) at least 24 hours prior to drilling.

6. Permittee, permittee's contractors, consultants or agents shall be responsible to assure that all material or waters generated during drilling, boring destruction, and/or other activities associated with this Permit will be safely handled, properly managed, and disposed of according to all applicable federal, state, and local statutes regulating such. In no case shall these materials and/or waters be allowed to enter, or potentially enter, on or off-site storm sewers, dry wells, or waterways or be allowed to move off the property where work is being completed.

7. Remove the Christy box or similar structure.

Destroy well by grouting neat cement with a tremie pipe or pressure grouting (25 psi for 5min.) to the bottom of the well and by filling with neat cement to three (3-5) feet below surface grade. Allow the sealing material to spill over the top of the casing to fill any annular space between casing and soil.

After the seal has set, backfill the remaining hole with concrete or compacted material to match existing conditions.

8. Copy of approved drilling permit must be on site at all times. Failure to present or show proof of the approved permit application on site shall result in a fine of \$500.00.

9. Electronic Reporting Regulations (Chapter 30, Division 3 of Title 23 & Division 3 of Title 27, CCR) require electronic submission of any report or data required by a regulatory agency from a cleanup site. Submission dates are set by a Regional Water Board or by a regulatory agency. Once a report/data is successfully uploaded, as required, you have met the reporting requirement (i.e. the compliance measure for electronic submittals is the actual upload itself). The upload date should be on or prior to the regulatory due date.
