7/10/01 Oked new location  
of TR-8 to D. Kleesattel

## FAX TRANSMITTAL

Warehouse Property

Date: July 9, 2001

Send to fax # 510-337-9335

To: Mr. Barney Chan

From: David Kleesattel

At Ext: 541

Project name: 2855 Mandela Pkwy  
Oakland, CA

Project number: 2543.02

Number of pages including cover: 2

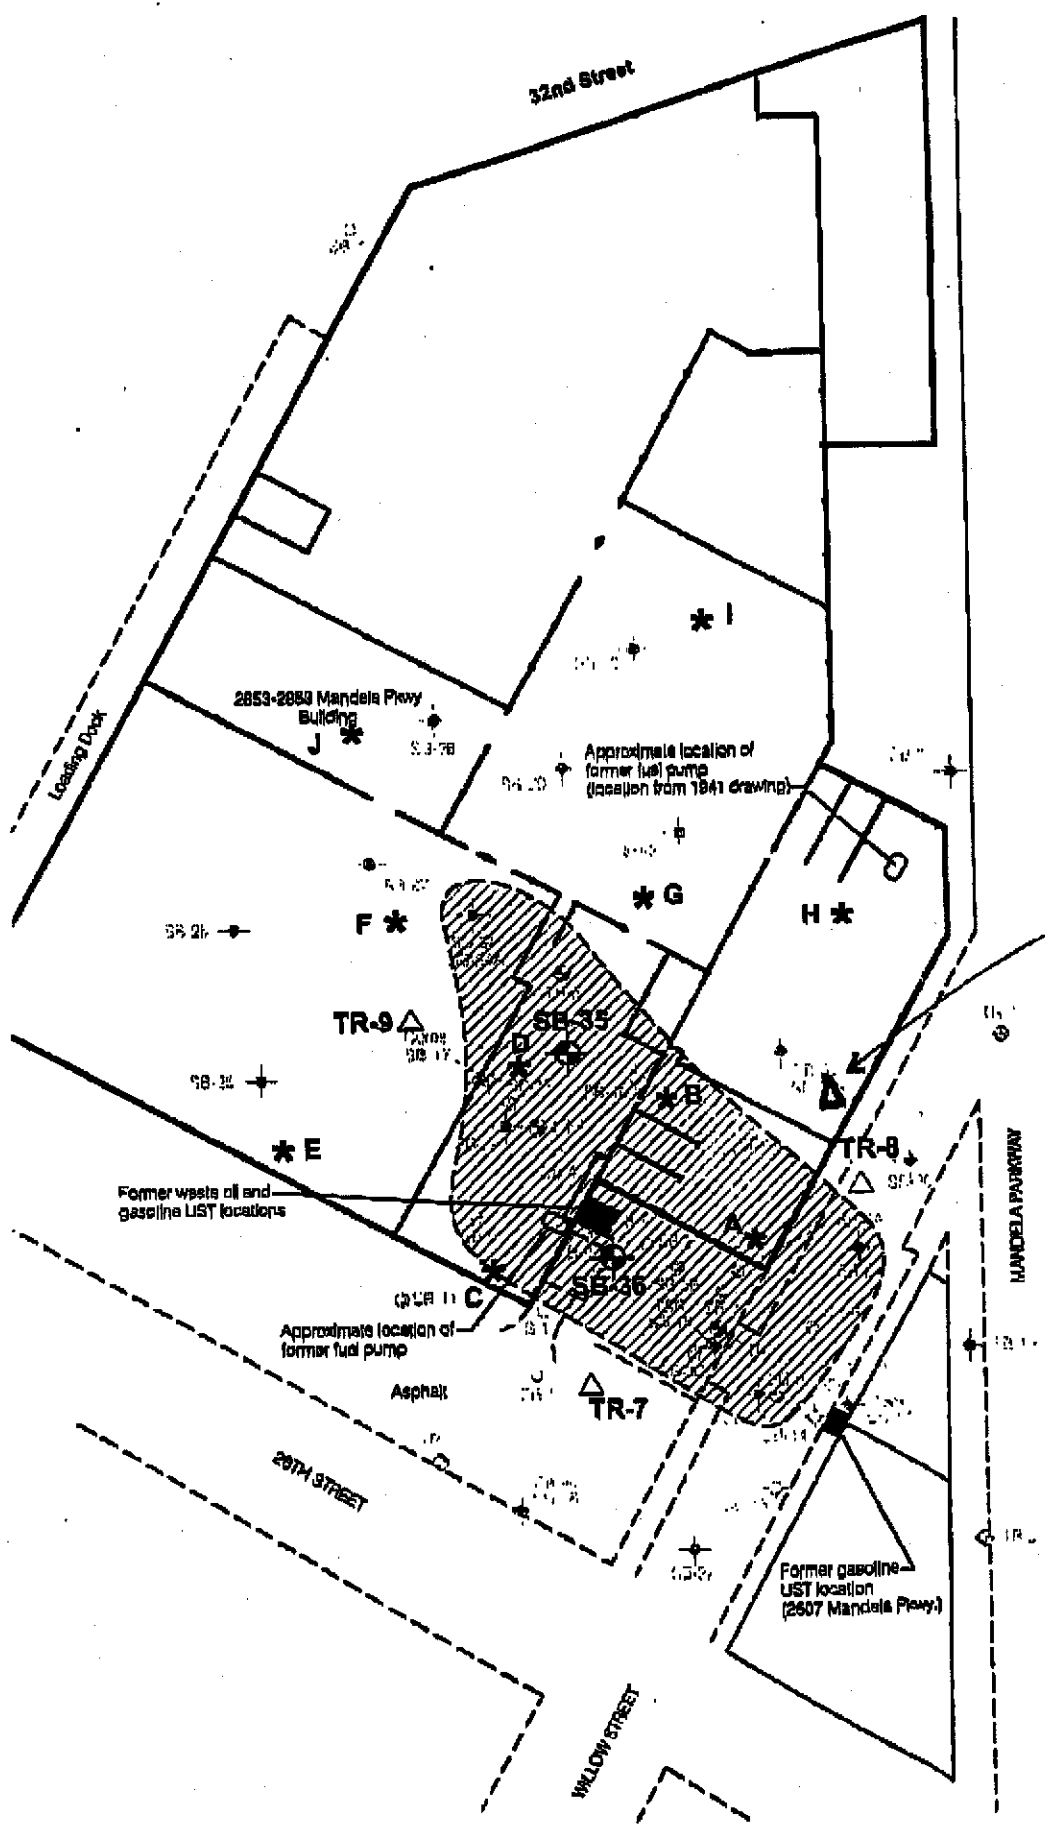

Notes: Barney - We have installed the 10 proposed vapor (A-J)  
monitoring points and 2 of the 3 free product monitoring  
wells. Because of physical constraints and permitting issues, we  
have not been able to install the proposed well TR-8 (see  
attached map). The purpose for that well is to monitor  
the lateral extent and migration of free product at the site.  
We are requesting approval to relocate proposed well TR-8  
approximately 20 feet to the north-northwest to facilitate  
its installation. We believe that this new location will provide  
equivalent information as the originally-proposed location. Please review  
the attached map and I will call you later to discuss.

Thanks,

This document will also be mailed to you:  Yes

No David K.

Should you encounter any difficulties with this fax, please call (510) 874-4500

new proposed location for well TR-8 (inside building)
