**Subject:** RO378- Wareham Property Development  
**Entry Type:** Phone call  
**Company:** Trihydro  
  
**Start:** Mon 11/26/2012 11:00 AM  
**End:** Mon 11/26/2012 11:10 AM  
**Duration:** 10 minutes

Returned a voicemail from Greg Johnson, consultant with Trihydro, re a work plan for Wareham Property Development, 2855 Mandela Pkwy- RO378. They are proposing using UVOST to aid in plume delineation. Mr. Johnson indicated it was a tricky site with heterogeneous peat and local perched GW complicating site cleanup. The UVOST system would give vertical and horizontal data on contaminant distribution. I asked if UVOST could provide lithologic data- he said it doesn't. There is a building on site and can't be excavated. I said the WP will not be reviewed this week but will be some time in the near future. The site is in the Fund so will need authorization to proceed.
