IF YOU DO NOT RECEIVE ALL PAGES, PLEASE CALL (510) 283-7695.***

Remarks:

eva,

Attached for your review is a map of the subject site showing the existing monitoring wells, the locations of the temporary well points as originally planned, and the proposed changes to these locations. The proposed changes are as follows:

- move WP-12 to the south to obtain better coverage of the area to the southwest of the site and the consistent concentrations of TPH that have been found in MW-3;
- move WP-11 to the south because its current location is close to MW-1 thereby providing somewhat redundant data and because moving it will fill a gap resulting from moving WP-12;
- moving WP-13 to the east will provide for easier access in the vacant lot where WP-7, -8, and -9 are located rather than in the driveway of a church (its current location);
- eliminate WP-4, located in 98th Avenue because its location is redundant to MW-18.

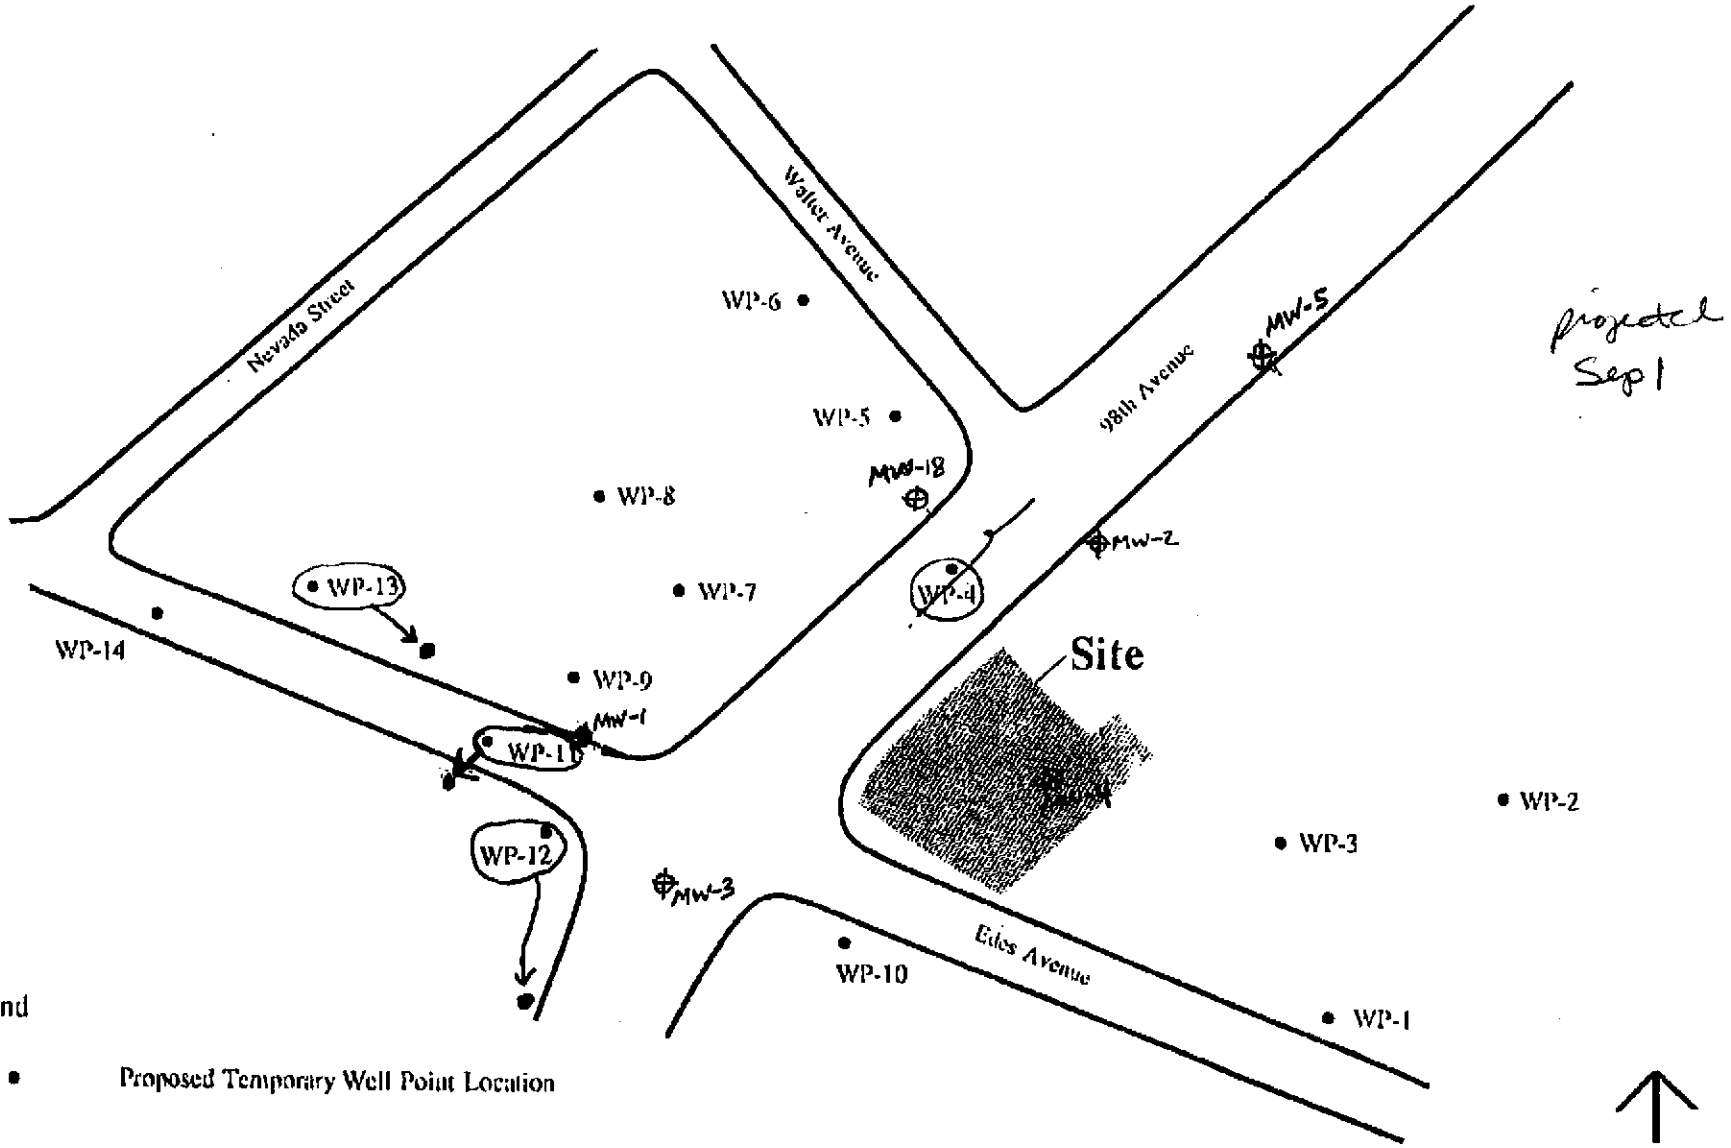

Please call me at 238-7695, to discuss these modifications or if you require additional information.

Thank you.

Mark
