July 31, 1989

Lowell Miller
Alameda County Hazardous Materials Division
80 Swan Way, Room 200
Oakland, CA 94621

Subject: Contamination of Soil of 187 North L Street, Livermore, California, 94550

Dear Mr. Miller:

We received the letter from Alameda County Health Care Services Hazardous Material Division, dated July 25, 1989, and are taking immediate action to achieve compliance.

I have been retained as an Attorney on behalf of Don Sul Inc., the owner of the property of 187 North L Street. We have retained a science consultant who is now reviewing the Woodward Clyde analysis. Leslie Peeters, from Science Applications International Corporation, will be preparing an "unauthorized release" report.

I certainly appreciate you taking the time the other day to explain to me the County requirements. As discussed, we are requesting your computer generated list of underground tanks upon which Alameda County has initiated investigations. If possible, I would like to have the location of the tanks and the name, address and phone number of the owner or contact person with respect to the various incidents. Given the other expenses, we are facing in this incident, we would not be interested in paying for a special programming effort. Please call, or have your computer person call, when you know whether what information is available.

Thanks again for your assistance.

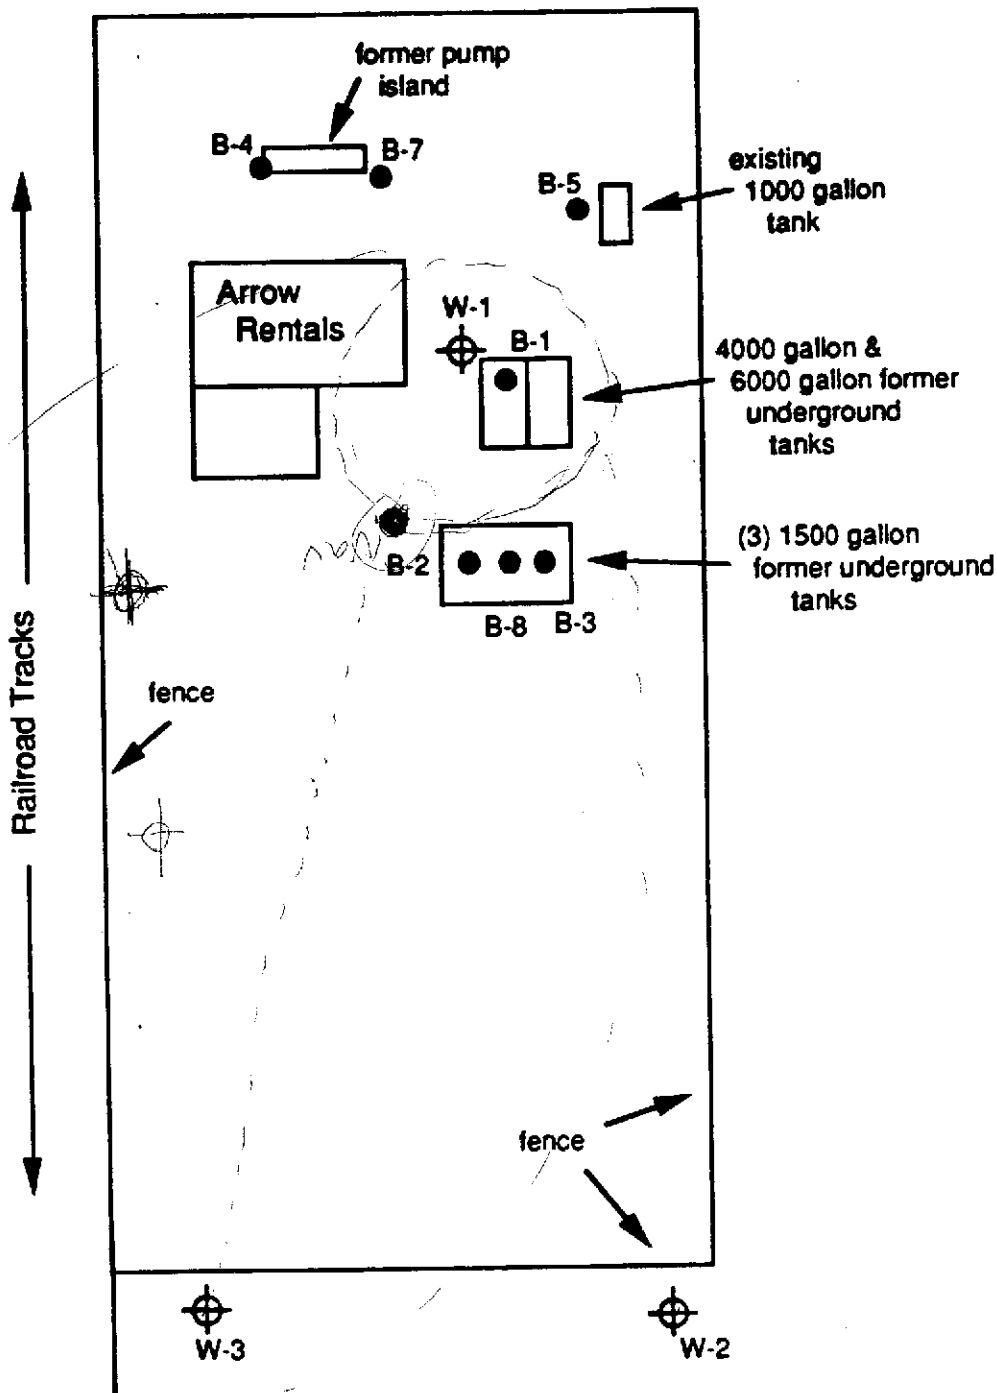

Very truly yours,

Peter MacDonald
Attorney at Law
