Ms. Sanborn,

I have not received any reports or other documentation to indicate that the monitoring wells have been decommissioned. Therefore, the site remains out of compliance with directives from my agency.

Regards,

Jerry Wickham

Subject: Bay Area Diablo Petroleum, 421 23rd Ave, Oakland, Case No. RO0000395

Mr. Wickham,

The UST Cleanup Fund (Fund) has received a reimbursement request for this claim (Fund Claim 13772) and in looking at Geotracker, notice that there is a November 3, 2010 Notice of Violation from your Agency. We will return the reimbursement request if the claimant is still out of compliance.

As far as you are concerned, are they still out of compliance with your directive to destroy the monitoring wells? It doesn't appear that any reports have been uploaded to Geotracker since 2009.

Thanks for your assistance.

Linda Sanborn
