**REMEDIAL ACTION COMPLETION CERTIFICATE**

Subject: Fuel Leak Case, RO0000397 and Geotracker Global ID T0600101631, Caltrans South Oakland Maintenance Station, 1112 29<sup>th</sup> Avenue, CA 94601

Dear Ladies and Gentlemen:

This letter confirms the completion of a site investigation and remedial action for the underground storage tanks formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank(s) site is in compliance with the requirements of subdivisions (a) and (b) of Section 25299.37 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.77 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (h) of Section 25299.37 of the Health and Safety Code.

Please contact our office if you have any questions regarding this matter.

Sincerely,

  
Ariadna Levi  
Director  
Alameda County Environmental Health

Subject: Fuel Leak Case, RO0000397 and Geotracker Global ID T0600101631, Caltrans South Oakland Maintenance Station, 1112 29<sup>th</sup> Avenue, CA 94601

Dear Ladies and Gentlemen:

This letter transmits the enclosed underground storage tank (UST) case closure letter in accordance with Chapter 6.75 (Article 4, Section 25299.37[h]). The State Water Resources Control Board adopted this letter on February 20, 1997. As of March 1, 1997, the Alameda County Environmental Health (ACEH) is required to use this case closure letter for all UST leak sites. We are also transmitting to you the enclosed case closure summary. These documents confirm the completion of the investigation and cleanup of the reported release at the subject site. The subject fuel leak case is closed.

**SITE INVESTIGATION AND CLEANUP SUMMARY**

Please be advised that the following conditions exist at the site:

- Residual pollution remaining in soil beneath the site includes MTBE at concentrations of up to 9.15 ppm.
- Maximum concentrations of up to 1,300 ppb TPH as gasoline and 3,200 ppb MTBE remain in groundwater beneath the site.

If you have any questions, please call Barbara Jakub at (510) 639-1287. Thank you.

Sincerely,

A handwritten signature in black ink, appearing to read "Donna L. Drogos".

Donna L. Drogos, P.E.  
Division Chief

**Alameda County Environmental Health****CASE CLOSURE SUMMARY  
LEAKING UNDERGROUND FUEL STORAGE TANK - LOCAL OVERSIGHT PROGRAM****I. AGENCY INFORMATION**

Date: August 30, 2010

Agency Name: Alameda County Environmental Health	Address: 1131 Harbor Bay Parkway
City/State/Zip: Alameda, CA 94502-6577	Phone: (510) 383-1767
Responsible Staff Person: Barbara Jakub	Title: Hazardous Materials Specialist

**II. CASE INFORMATION**

Site Facility Name: Caltrans South Oakland Maintenance Station		
Site Facility Address: 1112 29 <sup>th</sup> Ave Oakland, CA 94601		
RB Case No.: 01-1763	STID No.: 2933	LOP Case No.: RO0000397
URF Filing Date: May 15, 1997	Geotracker ID: T0600101631	APN: 25-693-7-2
Responsible Parties	Addresses	Phone Numbers
William Whitely, Caltrans	111 Grand Ave., Oakland, CA 94612, Mail Stop 8C	510-286-5668
State of California	P.O. Box 23440 Oakland, CA 94623-0440	---
---	---	---

Tank I.D. No	Size in Gallons	Contents	Closed In Place/Removed?	Date
1	4,000	Diesel	Removed	March 11, 1997
2	2,000	Gasoline	Removed	March 11, 1997
---	---	---	---	---
Piping		Removed	March 11, 1997	

### III. RELEASE AND SITE CHARACTERIZATION INFORMATION

Cause and Type of Release: UST reported to have possible leak in rib.		
Site characterization complete? Yes	Date Approved By Oversight Agency: ----	
Monitoring wells installed? Yes	Number: 4	Proper screened interval? Yes
Highest GW Depth Below Ground Surface: 7.65 feet bgs	Lowest Depth: 10.76 feet	Flow Direction: Southwest
Most Sensitive Current Use: Potential drinking water source.		

**Summary of Production Wells in Vicinity:** Two water supply wells were identified in a 1500 meter well survey. The property directly south of the site formerly owned by Del Monte operated two industrial wells, each at a depth approximately 875 feet bgs (below ground surface). One of the wells is known to be decommissioned; no information could be found pertaining to the other well. It is unlikely this well is a potential receptor for the site since the well is likely to be screened below the shallow aquifer and contaminant concentrations in the shallow aquifer on-site are attenuating and off-site concentrations were predominantly below the detection limits.

Are drinking water wells affected? No	Aquifer Name: East Bay Plain
Is surface water affected? No	Nearest SW Name: - Sausal Creek. Approximately 650 feet northeast
Off-Site Beneficial Use Impacts (Addresses/Locations): None	
Reports on file? Yes	Where are reports filed? Alameda County Environmental Health and Oakland Fire Department

TREATMENT AND DISPOSAL OF AFFECTED MATERIAL			
Material	Amount (Include Units)	Action (Treatment or Disposal w/Destination)	Date
Tank	1 – 2,000 gallon 1 – 4,000 gallon	Tanks disposed of at Erickson Inc. facility in Richmond, CA	March 11, 1997
Piping	Unavailable	Piping disposed of at Erickson Inc. facility in Richmond, CA	March 11, 1997
Free Product	----	----	----
Soil	52.4 tons	Soil disposed at TPS Technologies Richmond, CA	March 14, 1997
Groundwater	135 gallons	Groundwater disposed of at Evergreen Oil Co. in Newark, CA	March 14, 1997

**MAXIMUM DOCUMENTED CONTAMINANT CONCENTRATIONS BEFORE AND AFTER CLEANUP**  
(Please see Attachments 1 – x for additional information on contaminant locations and concentrations)

Contaminant	Soil (ppm)		Water (ppb)	
	Before	After	Before	After
TPH (Gas)	380	<0.5	5,200	1,300
TPH (Diesel)	33	23	<10	<10
Oil and Grease	Not analyzed	Not analyzed	Not analyzed	Not analyzed
Benzene	1.65	<1.0	220	40
Toluene	11.86	<1.0	92	<5.0
Ethylbenzene	8.04	<1.0	11	1.2
Xylenes	48.86	<3.0	40	<5.0
Heavy Metals (Cd, Cr, Pb, Ni, Zn)	8.7^ (cal-oak-stp-1)	8.7^ (cal-oak-stp-1)	Not analyzed	Not analyzed
MTBE	9.15*	9.15*	6,600**	3,200***
Other VOCs (8260)	Not Analyzed	Not Analyzed	12 <sup>+</sup>	12 <sup>+</sup>

<sup>^</sup> 8.7 ppm Pb: Cd, Cr, Ni, Zn not analyzed.

\* 9.15 ppm MTBE, <0.002 ppm EDB, and <0.001 ppm EDC. TBA, TAME, ETBE, DIPE, and EtOH all not analyzed.

\*\* 6,600 ppb MTBE; 890 ppb TBA; <0.5 ppb TAME; <0.5 ppb ETBE; <0.5 ppb DIPE. EtOH, EDB, and EDC not analyzed.

\*\*\* 3,200 ppb MTBE; 890 ppb TBA; <0.5 ppb TAME; <0.5 ppb ETBE; <0.5 ppb DIPE. EtOH, EDB, and EDC not analyzed.

<sup>+</sup> 12 µg/L PCE, 4.4 µg/L Chloromethane, 16 µg/L Chloroform, 1.8 µg/L iso-Propylbenzene, 5.4 µg/L N-propylbenzene, 3.5 µg/L Naphthalene, 31 µg/L 1,2,4-Trimethylbenzene, 12 µg/L 1,3,5-Trimethylbenzene,

**Site History and Description of Corrective Actions:**

The site is located at 1112 29<sup>th</sup> Avenue, Oakland in a commercial and industrial area, and is currently used by Caltrans as vehicle storage and maintenance station.

Lithology beneath the site consists of sand and gravel fill below and asphalt concrete pavement from the ground surface to depths ranging from three to five feet below ground surface (bgs). Underlying the fill material are fine grain soils consisting primarily of inter-bedded clayey sands and silts, and clays to a depth of approximately 25 feet bgs.

One 4,000-gallon UST and one 2,000-gallon UST were removed from the site on March 11, 1997. Associated piping and fuel dispensers were also removed at that time. Eight soil samples were collected from the tank pit excavation and soil stockpile, and approximately 52 tons of soil was removed and disposed of off-site. Analysis of soil samples collected from the tank pit indicated that an unauthorized release had occurred, and concentrations of up to 380 ppm TPHg, 1.65 ppm Benzene, 11.86 ppm Toluene, 8.04 ppm Ethylbenzene, 48.86 ppm Xylenes, and 9.15 ppm MTBE were detected in soil.

On April 6 and 7, 1999, soil and grab groundwater samples were collected from six soil borings (B-1 through B-6) installed at the site. Soil sampling data detected TPHg and MTBE at maximum levels of up to 13 ppm and 0.16 ppm in soil, respectively. Groundwater data collected during the investigation detected up to 520 µg/L TPHg and 6,600 µg/L MtBE. On August 13, 1999, soil and groundwater samples were collected from three additional borings (B-7 through B-9) were installed along the property boundary. MTBE, Benzene and TPHg were detected in groundwater samples at concentrations of up to 3,800 µg/L, 220 µg/L and 5,600 µg/L, respectively, while TPHg and MTBE were detected in soil samples at concentrations of up to 0.54 ppm and 0.011 ppm, respectively.

Four groundwater monitoring wells (MW1 through MW4) were installed on June 8, 2000 and a program of groundwater monitoring and sampling was implemented after well installation. Soil samples collected during the well installation detected TPHd and MTBE to the south of the former USTs at concentrations of up to 23 ppm and 0.52 ppm, respectively. MTBE was detected in all groundwater samples and was reported highest south of the former USTs (MW-3). TPHg, VOCs, and BTEX (Benzene, Toluene, Ethylbenzene, and Xylenes) were detected directly north and south of former USTs in the groundwater.

On August 24, 2001 three soil borings (B-10 through B-12) were installed offsite to define the lateral extent of contamination downgradient of the site. TPHg, BTEX and MTBE were not detected in soil above laboratory reporting limits. Groundwater samples detected maximum concentrations of up to 2.1 µg/L MTBE southwest of the site, while TPHg and BTEX were not detected above laboratory reporting limits.

Groundwater monitoring has been conducted at the site from June 2000 to May of 2005. Groundwater gradient has typically been toward the southwest, with groundwater elevations between 8 feet to 10 feet below ground surface. The most recent groundwater data collected in May 2005 detected elevated levels of up to 1,300 µg/L TPHg, 40 µg/L benzene 3,200 µg/L MTBE and 890 µg/L TBA.

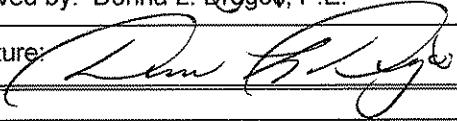

**IV. CLOSURE**

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes		
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes		
Does corrective action protect public health for current land use? Alameda County Environmental Health staff does not make specific determinations concerning public health risk. However, based upon the information available in our files to date, it does not appear that the release would present a risk to human health based upon current land use and conditions.		
Site Management Requirements:  Case closure for this fuel leak site is granted for the current industrial land use only. If a change in land use to any commercial, residential, or other conservative land use scenario occurs at this site, Alameda County Environmental Health (ACEH) must be notified as required by Government Code Section 65850.2.2. ACEH will re-evaluate the case upon receipt of approved development/construction plans.  Excavation or construction activities in areas of residual contamination require planning and implementation of appropriate health and safety procedures by the responsible party prior to and during excavation and construction activities.  This site is to be entered into the City of Oakland Permit Tracking System due to the residual contamination on site.		
Should corrective action be reviewed if land use changes? Yes		
Was a deed restriction or deed notification filed? No		Date Recorded: --
Monitoring Wells Decommissioned: No		Number Decommissioned: 0      Number Retained: 4
List Enforcement Actions Taken: None		
List Enforcement Actions Rescinded: None		

**V. ADDITIONAL COMMENTS, DATA, ETC.**

<b>Considerations and/or Variances:</b> <ul style="list-style-type: none"><li>• TBA, TAME, ETBE, DIPE and EtOH not analyzed in soil.</li><li>• EDB, EDC and EtOH not analyzed in groundwater.</li></ul>
<b>Conclusion:</b>  Alameda County Environmental Health staff consider that the levels of residual contamination do not pose a significant threat to water resources, public health and safety, and the environment under the current industrial land use based upon the information available in our files to date. No further investigation or cleanup for the fuel leak case is necessary at this time. However, as specified in the Site Management Requirements, re-evaluation of this case may be required if land uses changes to any residential or other conservative land use scenario; or construction or excavation activities take place or the building structure is otherwise modified. ACEH staff recommend closure for this site.

## VI. LOCAL AGENCY REPRESENTATIVE DATA

Prepared by: Barbara Jakub, P.G.	Title: Hazardous Materials Specialist
Signature: 	Date: 8/30/10
Approved by: Donna L. Drogos, P.E.	Title: Division Chief
Signature: 	Date: 9/2/10

This closure approval is based upon the available information and with the provision that the information provided to this agency was accurate and representative of site conditions.

## VII. REGIONAL BOARD NOTIFICATION

Regional Board Staff Name: Cherie McCaulou	Title: Engineering Geologist
Notification Date: 9/2/10	

## VIII. MONITORING WELL DECOMMISSIONING

Date Requested by ACEH: 10/5/10	Date of Well Decommissioning Report: 6/20/2011	
All Monitoring Wells Decommissioned: Yes	Number Decommissioned: 4	Number Retained: 0
Reason Wells Retained: ---		
Additional requirements for submittal of groundwater data from retained wells: ---		
ACEH Concurrence - Signature: 	Date: 7/25/11

Hello Cherie,

Attached is a closure summary for RO0000397; Caltrans South Oakland Maintenance Station located at 1112 29<sup>th</sup> Avenue in Oakland to comply with the RWQCB's 30-day review period. If no comments from the RWQCB are received within the 30-day review period, ACEH's will proceed with case closure.

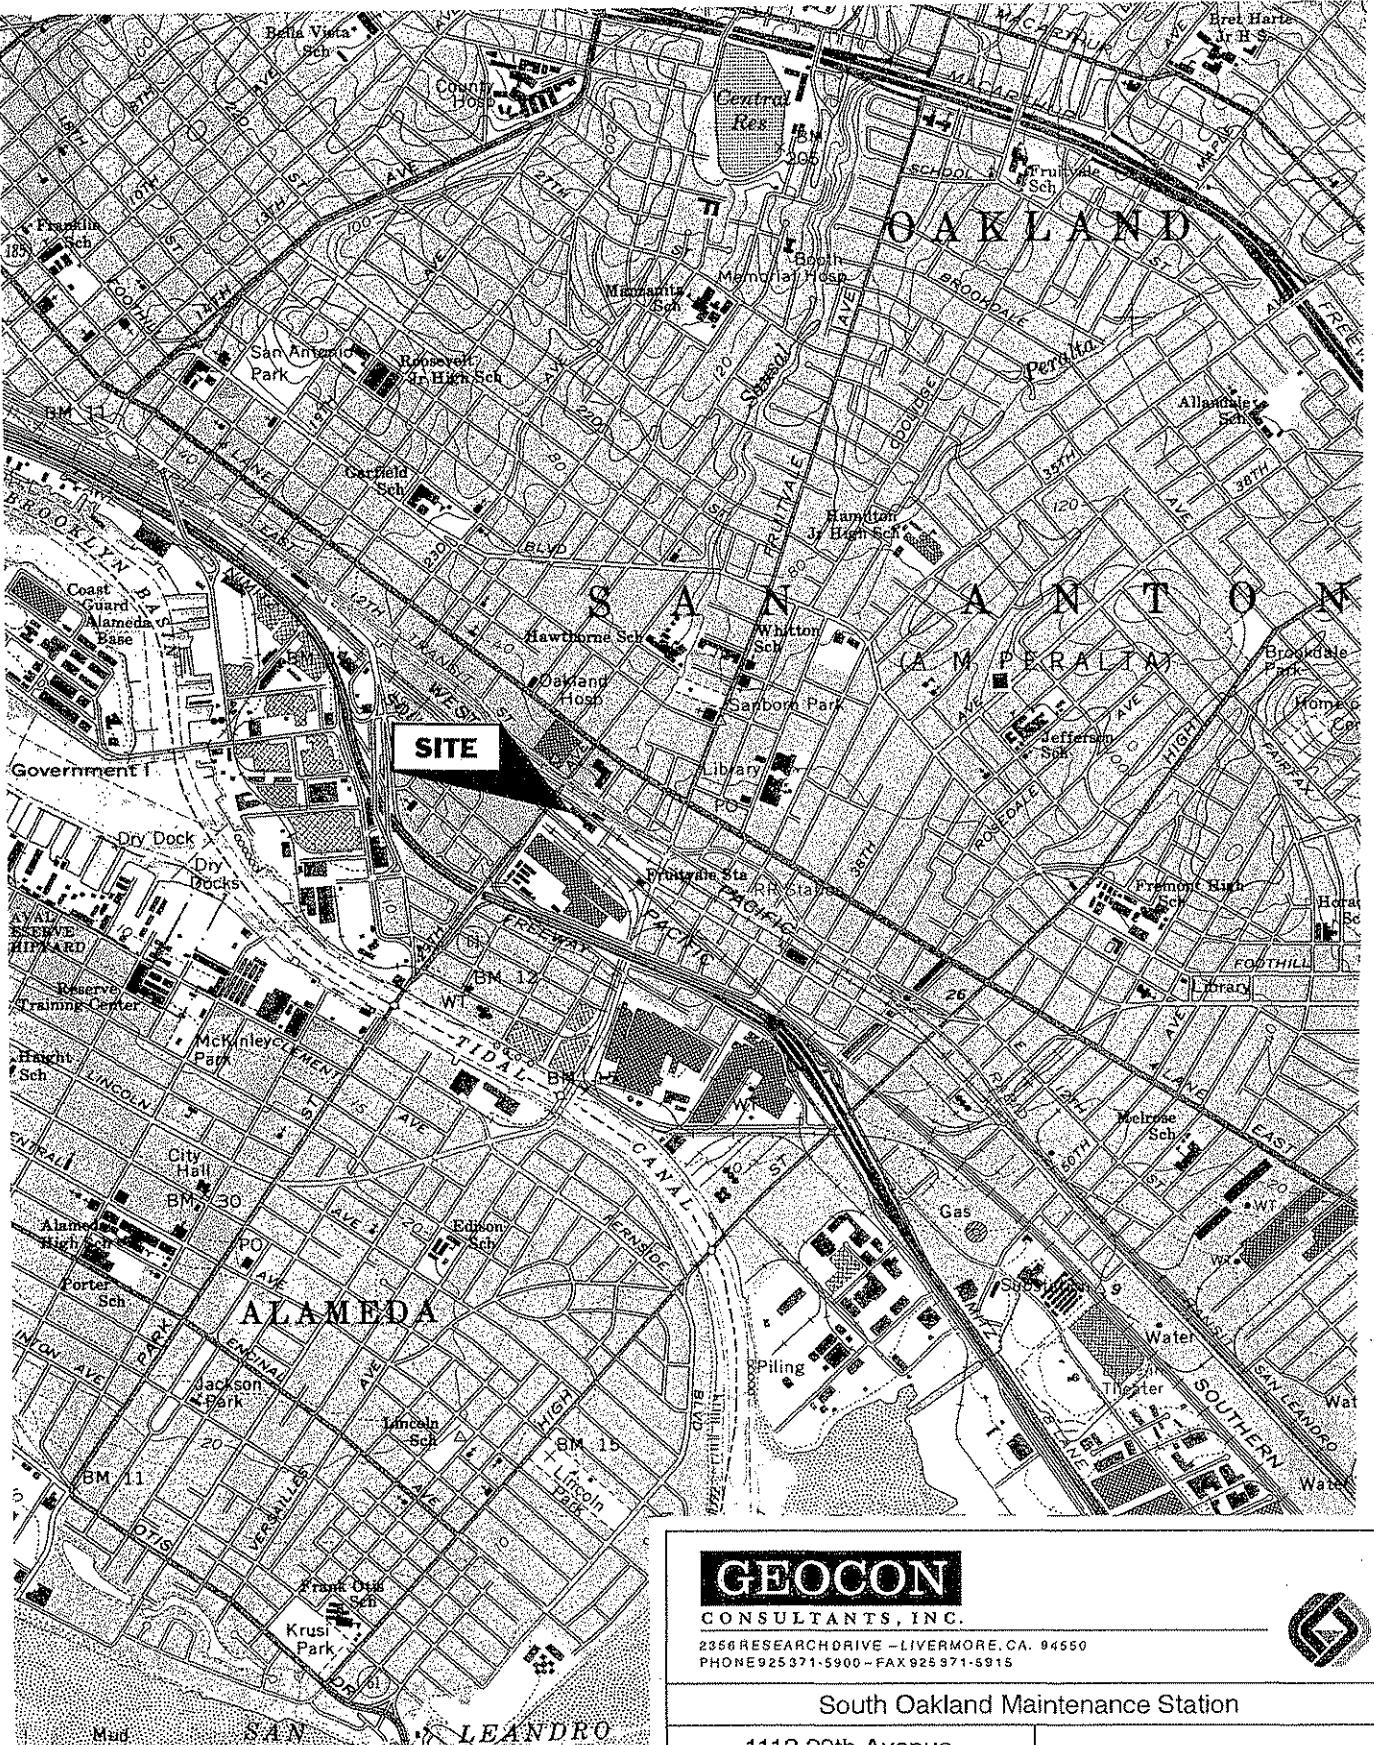

Please contact me if you have any comments or questions regarding the subject site.

Regards,

Barbara Jakub, P.G.

Notes -

Bold type indicates compound detected above reporting limit

mg/kg - milligrams per kilogram

ug/kg - Micrograms per kilogram

-- Not analyzed

PCE - tetrachloroethene

VOCs - volatile organic compounds analyzed using Test Method 8260B

FOCs - fuel oxygenate compounds including tert-Butanol (TBA), tert-amyl-methyl ether (TAME), tert-butyl ethyl ether (ETBE), and di-isopropyl ether (DIPE)

MTBE - methyl tertiary butyl ether

**Client:** A.E. Schmidt Environmental  
**Attn:** Mr. Chris Thixton

**Client's Project: Caltrans Maintenance Yard**

Date Received: 03/12/97

Date Sampled: 03/11/97

### **MDL = Method Detection Limit**

**ND** = Not Detected (Below DLR)

**DF = Dilution Factor (DLR/MDL)**

Reviewed/Approved By:

*Cheret de l'orn*

Date: 3/13/97

Notes-

Bold type indicates compound detected above reporting limit

mg/l - milligrams per liter

ug/l - micrograms per liter

TOC - top of casing

bgs - below ground surface

\* - elevation measured relative to an arbitrary datum assigned a value of 100.00 feet

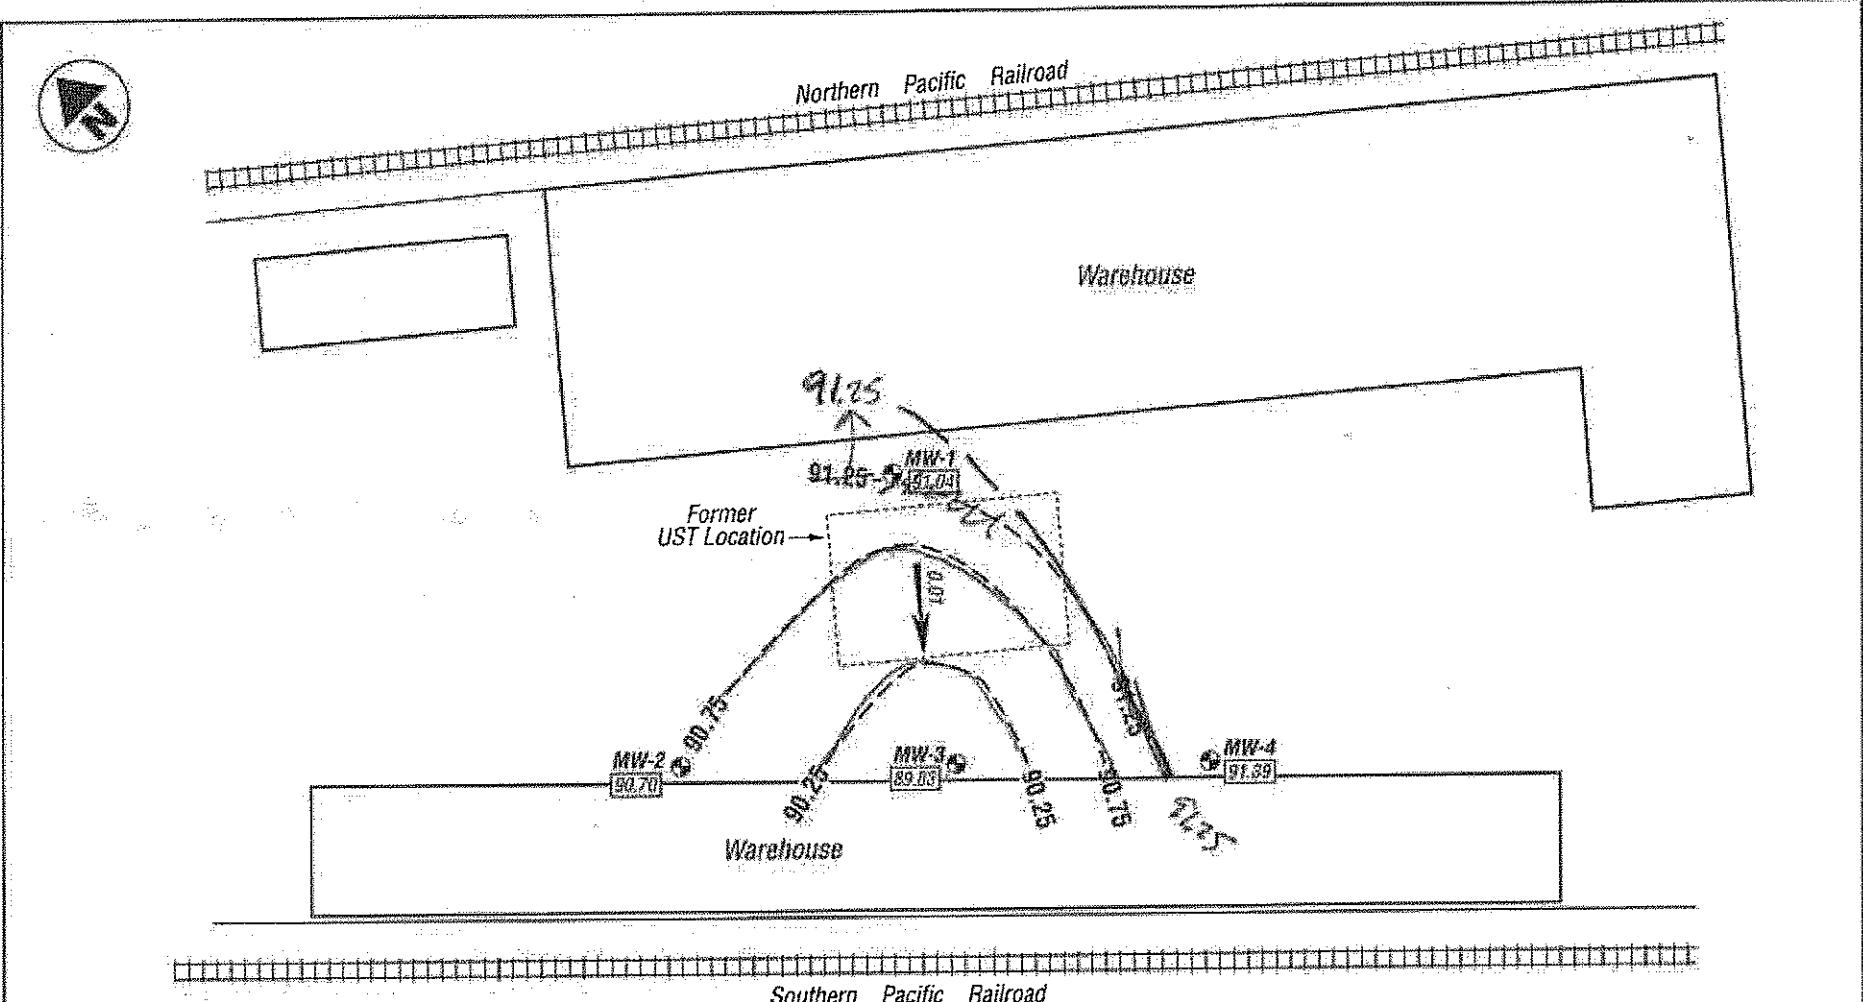

MTBE - methyl tertiary butyl ether

ETBE - Ethyl tertiary butyl ether

TAME - tertiary amyl methyl ether

TBA - tert-butanol

DIPE - di-isopropyl ether
