John,
You will need to pardon a new case worker who's not had a chance to fully review but a fraction of the case load but who was required to issue "Resolution" groundwater monitoring reduction letters and NOV letters by a deadline. I do see previous correspondence in the case file as you state. Like most Emeryville sites, this will take some time to tease apart, but I'll use your correspondence to help the that process and make a final determination from the county's perspective.
Thanks,

Mark Detterman
