Frequency of Groundwater Monitoring: Semi-annually; semi-annual free product gauging
Is FP Present On-Site: No
Current Remediation Techniques: None currently
Approximate Depth to Groundwater: NA
Groundwater Gradient (direction): NA

DISCUSSION:

No environmental activities took place at this site during this quarter, other than well head repairs. The most recent quarterly data can be referenced in the third quarter 2003 quarterly monitoring report for the site. Since free product has not been detected in well RW-1 since January 2001, URS reduced free product gauging to semi-annually, as recommended in the Second 2003 and First 2004 Semi-Annual Groundwater Monitoring Reports, in accordance with the 60-day regulatory response clause in Title 23, Division 3, Chapter 16, Article 11, Section 2722 of the California State Water Code. Since MTBE concentrations in well AW-6 have generally been increasing over the last several years, URS increased sampling to semi-annually, as recommended in the Fourth Quarter 2003 Status Report.
