Re: **Request for Report Extension**
Former Shell Service Station
8930 Bancroft Avenue
Oakland, California
SAP Code 135678
Incident No. 98995742
ACHCSA Case No. RO0000404

Dear Mr. Wickham:

Conestoga-Rovers & Associates (CRA) prepared this letter on behalf of Equilon Enterprises LLC dba Shell Oil Products US (Shell) to request an extension for the submittal of the report of findings associated with the July 25, 2008 *Agency Response and Site Investigation Work Plan* for the above site, which proposed three onsite soil borings to investigate the soil conditions beneath the former first generation underground storage tanks at the site. In your work plan approval letter of February 7, 2008, you requested that the report of findings for the proposed site investigation be submitted by **June 6, 2008**.

Please be aware that implementation of the field activities was delayed because of recent field staff turnover at CRA resulted in reductions in available CRA field staff personnel, and in conjunction with scheduling constraints with the well drillers, it resulted in the need to reschedule the field activities.

Because of the recent reduction in available CRA field staff and the scheduling constraints with the drillers noted above, the earliest drilling date available to perform the work was **June 5, 2008**, and the work has been scheduled for that day. Based on the date of scheduled field activities, we will need additional time to receive the lab reports and prepare the technical report. We respectfully request an extension for the submittal of the report for the proposed site investigation to no later than **August 15, 2008** (approximately 60 days following receipt of analytical data for the borings).

Please let me know as soon as possible if this request is acceptable with you.
