

CONTRACT LOG (3530 MacArthur Blvd.)

07/09/99 Called Phil Briggs, Chevron 925-842-9136. Discussed the need to conduct investigations on both Magee and MacArthur due to the storm and sanitary sewer lines running along both streets. Due to the improper screen intervals of MW1-MW3, I requested that the planned investigations include a "grab" or temporary well placed adjacent to the hottest well on site, MW2, to confirm historical sample results. Discussed the other comments on my NOTES. Mr. Briggs did not know why DTW during the 07/29/98 sampling event dropped so abruptly.

09/16/99 Called Brett Hunter, Chevron, 1-925-842-8895. Discussed site & required workplan w/ him. The Chevron has not yet begun addressing any of the requirements outlined in the County's July 19, 99 letter. Wrote letter & faxed to him.
