Subject: RE: Soil Vapor Investigation Update - RO409 (CVX Facility 351645) 4276 MacArthur Blvd., Oakland

Nicole,

Based on your request, the schedule for submittal of the vapor intrusion investigation report for the above referenced case is extended to October 30, 2013.

Please call me if you would like to discuss this case further.

Regards,
Jerry Wickham

Subject: Soil Vapor Investigation Update - RO409 (CVX Facility 351645) 4276 MacArthur Blvd., Oakland

Hi Jerry,

This is a follow-up to the voice message I left you this morning. I wanted to provide an update on the soil vapor investigation and reporting progress. AECOM collected vapor samples from both SV-1 and SV-2 on August 6th and we received analytical results this week. From our preliminary review of the results, we believe indoor and sub-slab vapor samples are necessary to complete our assessment. Roya mentioned that indoor air sampling was our original scope but we had difficulties obtaining access to Dr. Dorsey's building. A risk assessment evaluation and proposed additional activities will be included within the investigation report.

In light of the upcoming holiday, and given the amount of time for preparation and review of the report, it appears unlikely that a Soil Vapor Sampling Report can be completed by September 25th. Therefore, Chevron respectfully requests an extension of October 30th for the submittal of the vapor intrusion investigation report. Our plan is to submit the investigation report and the groundwater report at the same time.

Please do not hesitate to call if you have any questions or if you wish to discuss this matter further.

Thank you for your time,

Nicole Arceneaux
Project Manager
