

12/7/99

Meeting w/ G Norton re: PES CAP for site.

Referred Gary to the SWRCB Recommendations draft.

Discussed the concept of SCM.

Discussed the need for active remediation when [MTBE]

exceed 10 mg/l. (such as this site)

Apparently the PES ~~the~~ CAP recommends ORC rock in MW 2+3.

I said this wasn't appropriate.

I mentioned the use of Fenton's Reagent for the site &

that ~~potential~~ the RWQCB would be issuing their recommendations

for MTBE (likely like that of the SWRCB draft).

He was going to send me the PES QM R + CAP.

7/30/97 HazMat Mtg

Q. persons + CO - LOP

LOP - no more crs?

7/31 ~~8:17~~ ~~8:25~~

7/31/97

Mtg w/ G. Norton, J. Schroeter + R. Perry

- okay'd eliminating sampling from WAE-1
- add bio remediation parameters
- agreed to other monitoring requirements

• 'No further soil disposal' info ✓

• 'No more WAE-1' ✓

• 3 more well tests ✓

• 'additional' ~~bio~~ remediation parameters ✓

Check 2 mon 1009

3/21/97

P.E. Mtg. + Be.

Terry Knox, Rand Perry

Gary Norton & Margaret Wang

Needs:

- 1) Report for desigs of ~12,000 gallons of water.
- 2) 1300 cu = 110' x 10' x 35'
- 3) Report for confirmatory soils plus in exc. pit - want to reuse soils
 - will submit a req for soil characterization
 - will try to get report re: WA Craig's final exc. results & their report of water desigs
 - need to install mw's
