Re: Former Chevron Service Station No. 9-1723
98th & San Leandro Str., Oakland, California

Dear Ms. Chu :

In response to your letter dated June 14, 1994, Chevron will continue to sample well MW-2 on a quarterly basis and MW-9 on an annual basis. By sampling MW-2 and MW-9, Chevron is not admitting responsibility. Instead, Chevron is assisting and cooperating with Alameda Co. Environmental Health in obtaining additional information.

As it was stated to you earlier, Weiss Associates is evaluating this site. Weiss will be issuing a report on their findings. A copy of their report will be sent to your office for review. All reports generated by Chevron's consultant are submitted under seal by either a registered geologist or engineering geologist.

In Beta Associates report dated May 29, 1987, they list ten potential on-site sources. A map showing their approximate location is enclosed. Chevron is not sure who prepared the map.

Finally, the former Chevron station was closed in 1978.

If you have any questions or comments, please feel free to contact me at (510) 842-8752.

Sincerely,

Chevron U.S.A. Products Co.

Kenneth Kan
Engineer
