Subject: RE: Case #RO0000427; Chevron 90076 4265 Foothill Blvd, Oakland Extension Request

Hi Kiersten,

Thanks for the email. GHD is the first with this vapor sampling problem, and it is now a problem for several sites. Should you want to push this out further it may be appropriate as smoke from the fire is currently expected to be around though at least next Monday or Tuesday, with some possibility of rain that should really clear out the stagnant air hopefully by Wednesday or Thursday. In the interim, I have updated Geotracker to reflect an extension to February 1st, 2019 for the investigation report. That date should provide a bit more flexibility.

Regards,

Hi Mark,

I hope you're doing well. I'm emailing to update you on this project. We were scheduled to collect the crawl space and outdoor ambient air and soil vapor samples on Thursday the 15th; however, due to the poor air quality we are pushing the sampling to Tuesday, November 20th to avoid potential biased results. A report documenting the sampling activities and results will be submitted approximately 8 weeks after sampling.

Thank you,
Kiersten
