BACKGROUND:

In November 1992, three underground storage tanks were removed. Hydrocarbons were detected and the excavation was extended to a depth of 27 feet in the southwest corner. Hydrocarbons were detected in the sample collected from the base of the overexcavation.

In May and June 1993, three monitoring wells (MW-1 through MW-3), three vapor wells (VW-1 through VW-3), and one boring were drilled. The soil plume has been defined.

The site has been placed on a quarterly monitoring program.

In March 29 and 30, 1994, four additional offsite wells (MW-4 through MW-7) were installed. The ground-water plume is not defined downgradient.

In June 1994, performed assessment on the Livermore Arcade Shopping Center Property by drilling borings and collecting ground-water samples using a Hydropunch tool.

In June 1994, performed vapor extraction and ground-water extraction tests.

SUMMARY OF THIS QUARTER'S ACTIVITIES:

Performed quarterly monitoring on September 26, 1995.

In September 1995, began installation of vapor extraction and airsparging wells.

RESULT OF QUARTERLY MONITORING:

Monitoring data indicates that the benzene concentration remained not detected in MW-3 and MW-4. The benzene concentrations increased in MW-1 from 5.6 ppb to 140 ppb and in MW-5 from not detected to 61 ppb. The benzene concentration decreased in MW-2 from 11,000 ppb to 9,400 ppb, in MW-6 from 20,000 ppb to 15,000 ppb, and in MW-7 from 920 ppb to 200 ppb.

PROPOSED ACTIVITY OR WORK FOR NEXT QUARTER:

<u>ACTIVITY</u>	<u>ESTIMATED COMPLETION DATE</u>
Continue quarterly monitoring program.	
Complete installation of vapor extraction/ air sparging wells.	October 31, 1995
Obtain necessary permits.	December 1, 1995
Begin construction of remediation system.
