Bob,

I will not be needing much beyond the information in the case closure summary. At some point, I will likely be requesting that you distribute a public notification of potential case closure. I will prepare the notification and mailing list but will request that you distribute it.

With regard to the well destruction, pressure grouting will be acceptable provided that it is acceptable to the agency permitting the well destruction, Alameda County Public Works.

Regards,
Jerry Wickham
Alameda County Environmental Health

Jerry:Bob

Thank you for your November 2 letter recommending a formal case closure request for this site. Estes Trucking has requested that we provide them with a cost estimate to perform this work, including the destruction of the five onsite wells. I obtained a copy of a Case Closure Summary Form recently used for a Shell site and I assume that is the most recent iteration of it.

However, to insure that our estimate is accurate for the remaining tasks, I wanted to inquire what you consider a "complete package" for requesting case closure. Please let me know what you would like it to include so we can meet your requirements the first time and not need to submit additional information.

Also, we have requested an estimate for the destruction of the five wells from one of our subcontractors. Their estimate assumes that we will be approved to pressure grout the wells, drilling out the top 5 feet, as opposed to drilling out the entire length of each well. Can you verify this for me?

Thanks in advance for your quick response to this inquiry.

Bob
