Alton Project No. 41-0123

**SITE: FORMER MOBIL STATION 99-105
6301 SAN PABLO AVENUE
OAKLAND, CALIFORNIA**

RE: NOTICE TO CONDUCT ADDITIONAL SITE INVESTIGATION ACTIVITIES

Dear Ms. Lam:

On behalf of ExxonMobil Remediation Services we plan to install one soil boring at the above-referenced site. The exact location of the boring is shown on the attached site plan. The proposed field activities are scheduled to begin on Tuesday, January 25, 2000, at approximately 8:00 a.m. We anticipate the fieldwork will be complete in one to two days.

On January 21, Underground Service Alert (USA) will be notified and a geophysical survey will be conducted to identify potential underground utility lines near the proposed soil boring. The location of the proposed soil boring is shown on the attached figure. As part of this effort, we will need to review any utility plans or diagrams you may have for the site. Your cooperation is appreciated.

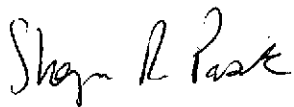

Our field personnel and subcontractors will make every effort to minimize disruption of operations and any inconvenience at the site. The area where the soil boring is installed will be restored as close to the original condition as reasonably possible. Your cooperation is necessary to ensure that the work will be completed in an efficient and safe manner.

Notification of Field Activities
Former Mobil Station 99-105
January 19, 2000

Should you have any questions regarding our scheduled field activity, please call Sarah Larese, Project Scientist, at (925) 688-2467.

Sincerely,

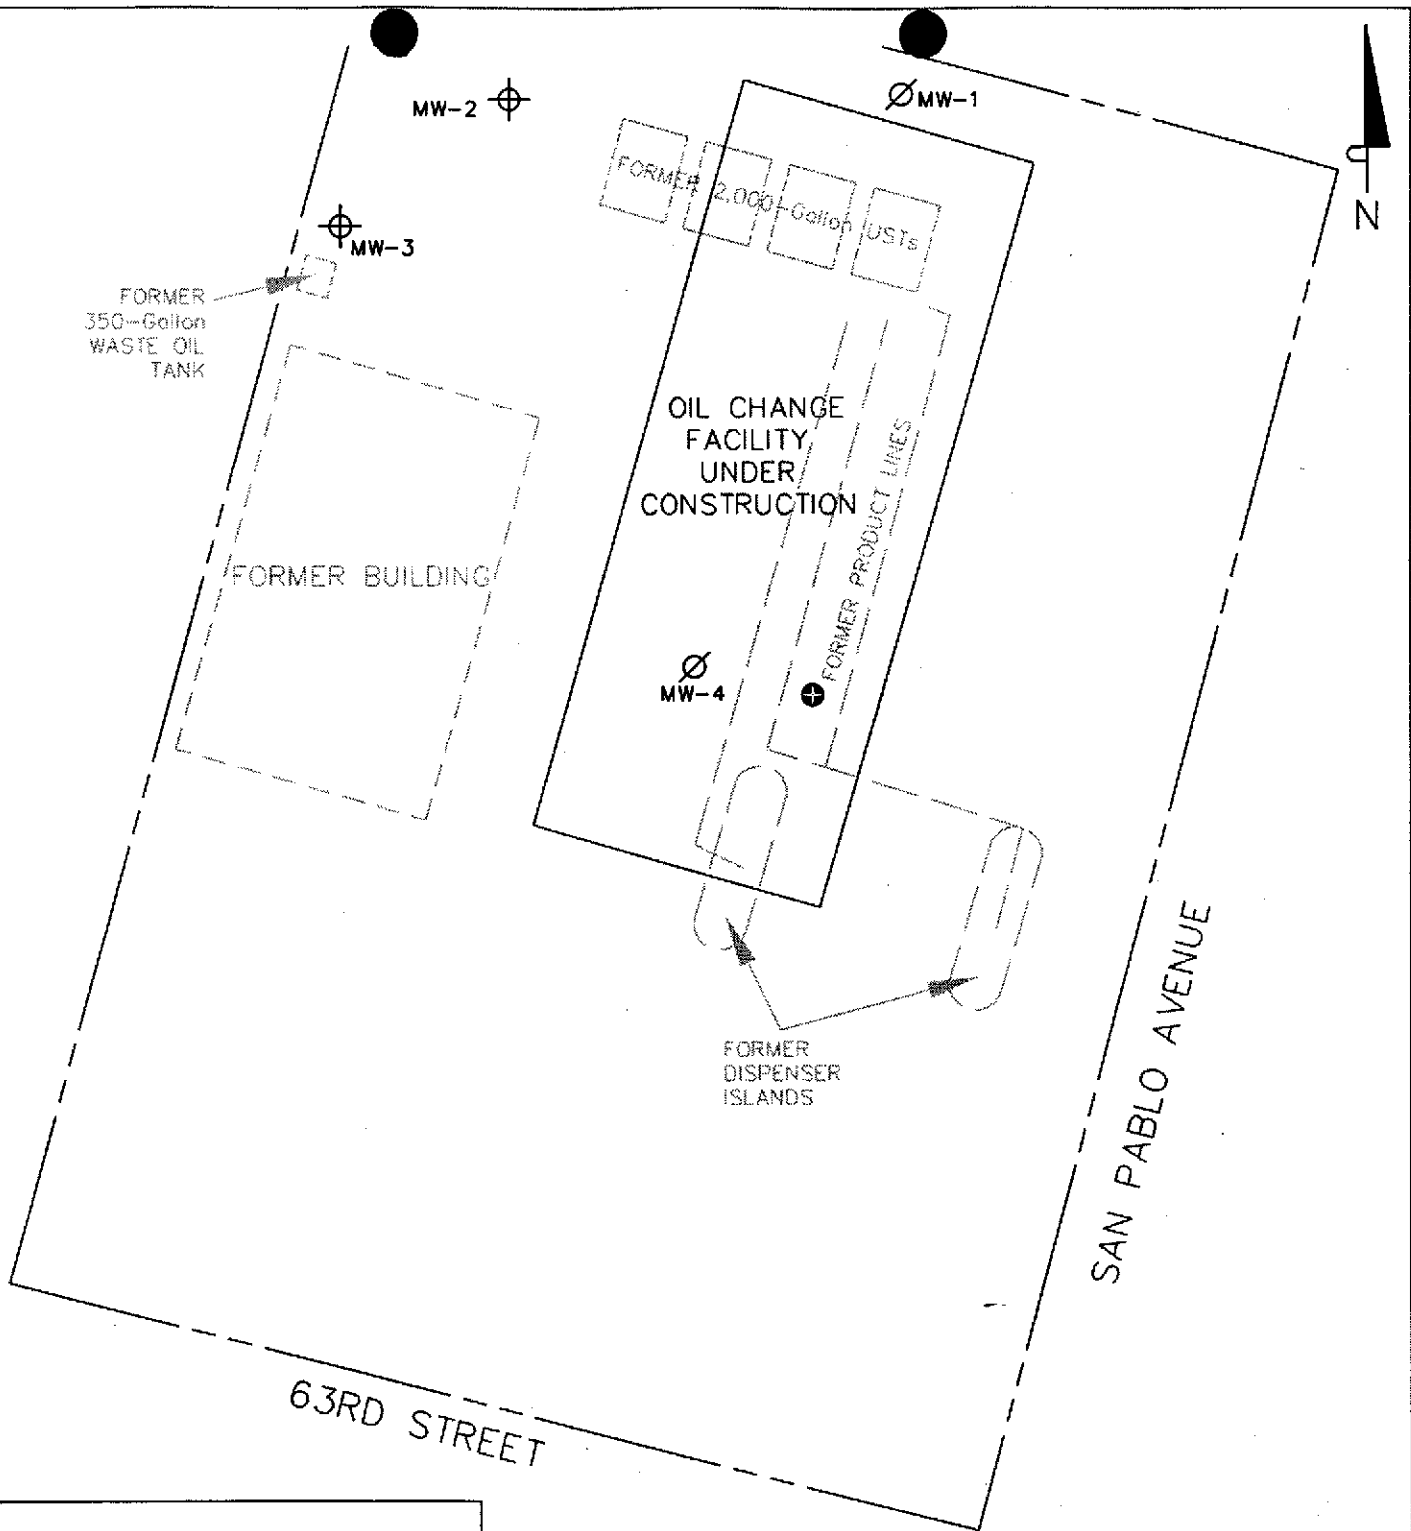

TRC/ALTON GEOSCIENCE

Shayne R. Pasek
Staff Geologist
