SUBJECT Notification of Groundwater Monitoring Well Installation Activities
Former Mobil Service Station 99105
6301 San Pablo Ave, Oakland, California 94608

Ms. Lam:

At the request of ExxonMobil Environmental Services (EMES), on behalf of ExxonMobil Oil Corporation, Cardno ERI is notifying you of the upcoming installation of three groundwater monitoring wells (MW6 through MW8) at the subject site. The proposed locations are shown on the attached Generalized Site Plan. The work is scheduled to begin on August 11, 2014. Cardno ERI anticipates that the work will take approximately two days to complete and will consist of a utility survey to assess the location of subsurface utilities, core-cutting of the locations, and installation of the wells using a truck mounted drill rig. The wells will be completed to surface with traffic-rated well vaults.

Cardno ERI will make every attempt to minimize disruptions to current site activities; however, some areas of the site may be blocked during drilling operations to protect workers and the general public. Waste generated during field activities will be temporarily stored at the site pending transportation to an EMES-approved disposal facility.

Please contact Mr. Greg Gurst, Cardno ERI's project manager for this site, at greg.gurst@cardno.com or at (916) 916-3130 with any questions

Sincerely,

David R. Daniels
