

5/4/99

Spoke w/ Tom Seeliger of Alton Geoscience

- I requested a copy of the results of the dual phase vapor ext test. Said they removed ~ 26 #s of H<sub>2</sub>, however, there is v. little influence in vapor probes, therefore, UES is not recommended.
- Also stated that the property owner, on their own, had initiated the development of site into an oil changer station. Soils (~600 cy) have been excavated down to ~6' bgs to lay the foundation for the oil changer building. MW's 1 & 4 may have been destroyed, it's believed they were not properly destroyed.
- Too soon to evaluate the effect of the UET - would like to monitor another round.

Reid call fr. de Monika Pierson (Mabil Oil Corp)  
re: intrusion (30 days) negotiating w/  
Ken Evans (ECRU)

Talked to de Monika Pierson - (Mabil Oil Corp)  
- left message  
- deadline for PSA 1/19/95

Rev 445

STID # 1683

8/15/95

Talked to Michael Valua (Valua & Corp) <sup>Healthy</sup>  
realtor for down gradient adjacent site  
buyer concerned about off site contamination  
told him contamination remains  
undefined.

11/29/95

Reviewed 10/12/95 WP (by Alisto Enge.)  
- need to add MTBE  
- no site maps - locate former tank areas,  
sampling points, well points.

## Phone Log #1683

- 12/11/96 Spoke w/Cherine Foutch w/mobile Oil Corp. She indicated that all Corresp. from County & State shall be sent to her attn: in Oakley. Her phone # is (510)625-1173. I told her I look forward to the next (4th) quarterly report and plan to do a complete review of the case to determine what the next step of investigation should be.
- 12/17/96 Kept msg w/Cherine Foutch & Lori Casias asking if they know of Ken Ewan's (former prop. owner) ~~also~~ current address

8/16/84 - TIP 1683

6301 Som Pablo Ave.  
E CRU INC.

{ Talked to Mr. Ken Evans  
re: UHR - will call  
Took Protect

8/17/84 { Talked to Lee Huckins }  
- no need to wait for  
lab results - the tanks had  
holes, free product present
