Subject: RE: Anderson Drilling delayed

John,

The drillers rescheduled for the 20th and today I realize I hadn't passed this along to you. We will be out at Anderson building tomorrow to survey utilities, drill two boreholes, and collect soil and groundwater samples.

Erik

Subject: Anderson Drilling delayed

John,

My geologist is stuck in the field on another job and I have had to cancel tomorrows drilling and sampling at Anderson Building. I'll let you know when we reschedule. When we do get out there we will follow the work plan and the three technical comments in the attached directive.
