Re: Work Plan Addendum  
Former Signal Station 800  
800 Center Street  
Oakland, California 94607

Dear Mr. Peacock:

This letter, prepared by Pacific Environmental Group, Inc. (PACIFIC) on behalf of Chevron U.S.A. Products Company (Chevron) presents an addendum to the work plan dated January 29, 1996. The original scope of work provided for the installation of up to eight shallow soil borings to further delineate petroleum hydrocarbons in soil and groundwater beneath the site.

Upon review the workplan, Ms. Jennifer Eberle requested that one of the well locations located at the corner of Center and Eighth Streets be moved to the east. An additional boring in the vicinity of the former underground storage tanks will be drilled in order to vertically define soil contamination near the center of the hydrocarbon plume. Figure 1 presents a site map with the modified soil boring locations.

Please call if you have any questions regarding this project.

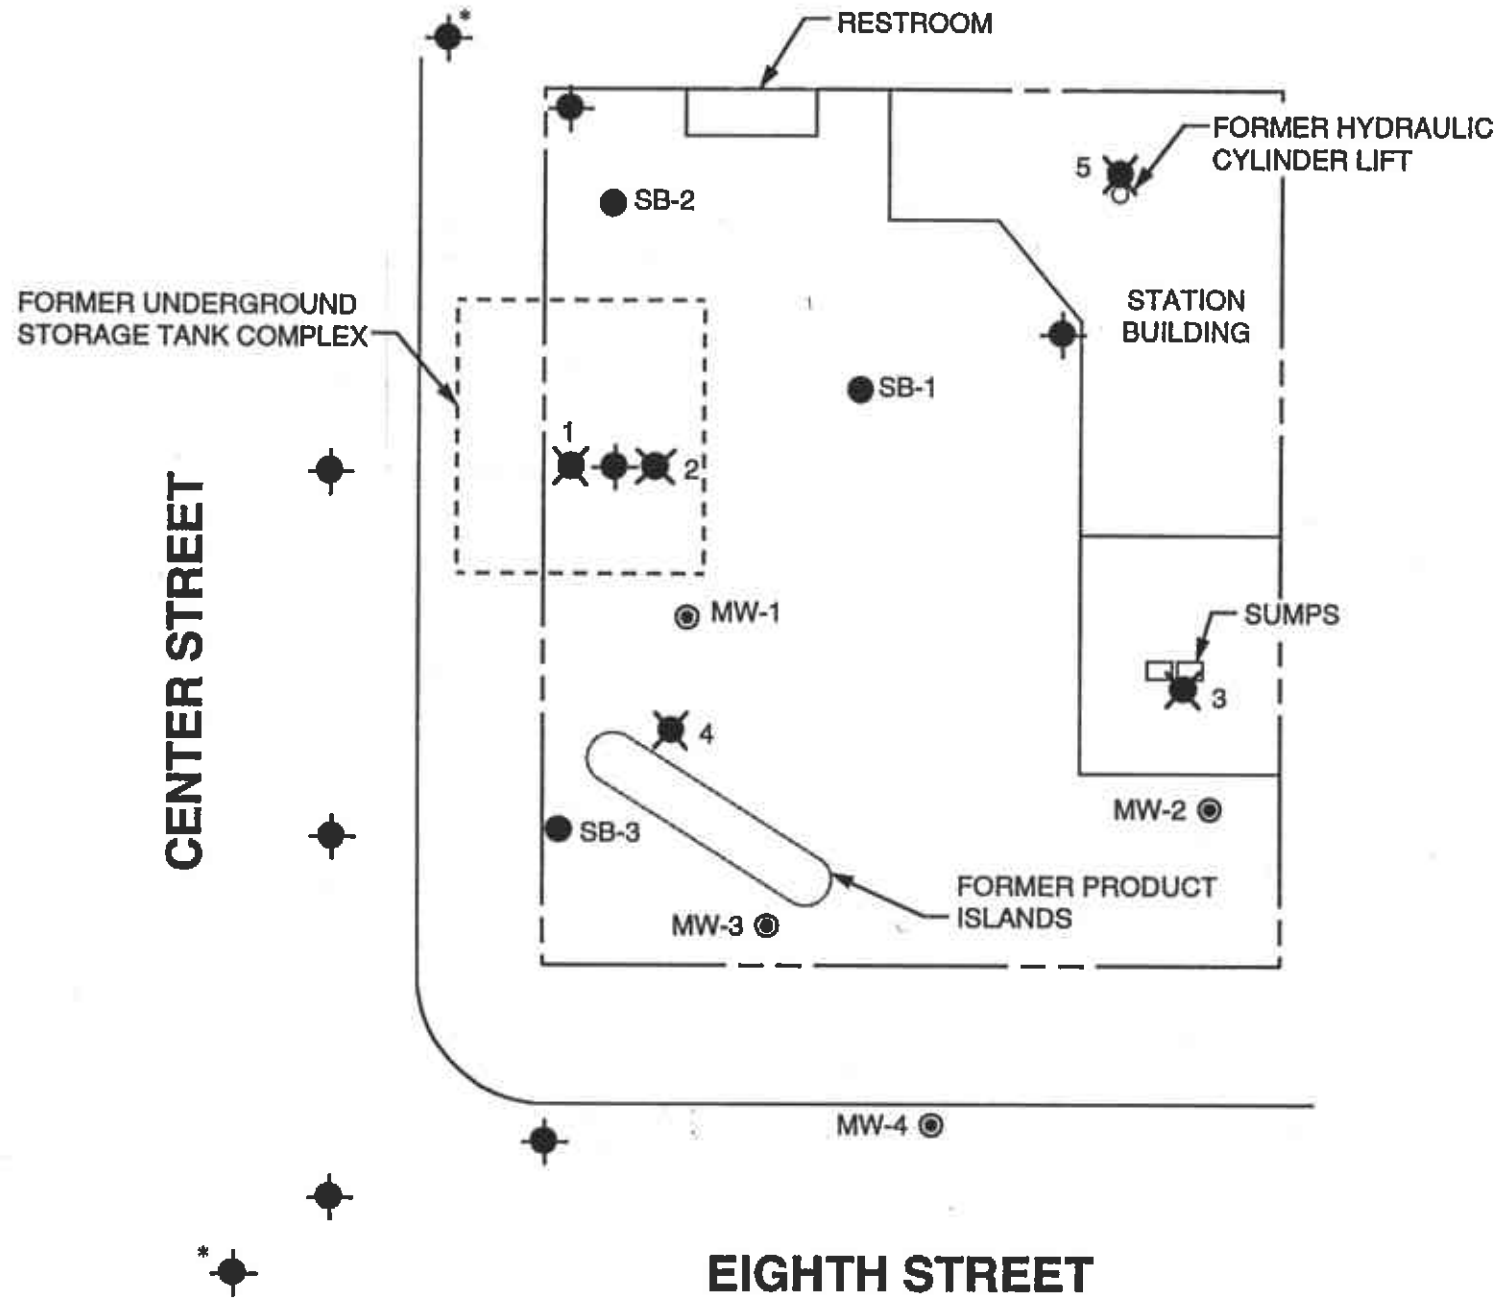

Sincerely,

**Pacific Environmental Group, Inc.**

Mark D. Sullivan  
Project Engineer
