RE: Stockpiled Soil Sampling for  
Unocal Service Station #1871  
96 MacArthur Boulevard  
Oakland, California

1871	SS	✓	SEP
	✓	ON	TRANSPORT

Dear Mr. Boust:

This report summarizes the disposal of soil at the above referenced site.

On August 3, 1994, soil samples were collected from approximately 45 cubic yards of stockpiled soil that were excavated during the removal of a waste oil tank. The samples were collected in order to determine proper disposal of the soil. On August 16, 1994, two additional soil samples were collected from the stockpiled soil to determine proper disposal of the soil. The August 16, 1994, samples were delivered to Laidlaw Environmental Services for testing. KEI has not received the analytical results from Laidlaw.

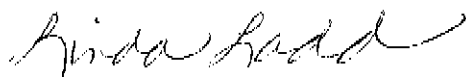

Based on the results of the tests, approximately 45 cubic yards of waste oil soil were profiled for disposal at Laidlaw Environmental Services (an approved Class II site) in Buttonwillow, California. On September 1, 1994, 45 cubic yards of stockpiled soil were transported to Laidlaw for disposal by Dillard Trucking of Byron, California.
