**Re: New ConocoPhillips Site Manager Contact**

Mr. Chan;

ConocoPhillips would like to inform you of a recent change in internal project management responsibilities. Eric Hetrick has now resumed site responsibilities and will be the primary contact person for the following sites.

76 Service Station No. 05748, 6401 Dublin Blvd, Dublin

Any correspondence relating to the above cases should be forwarded to:

ConocoPhillips Company  
Eric Hetrick  
76 Broadway  
Sacramento, CA 95818  
Email: [Eric.G.Hetrick@ConocoPhillips.com](mailto:Eric.G.Hetrick@ConocoPhillips.com)  
Ph: (916) 558-7604 Fax: (916) 558-7639

Should you have any questions regarding this change, please do not hesitate to contact me.

Sincerely,

Eric G. Hetrick  
Site Manager  
Risk Management & Remediation

**WELL COMPLETION REPORT RELEASE REQUEST AND CONFIDENTIALITY AGREEMENT  
REGULATORY-RELATED ENVIRONMENTAL CLEANUP STUDY**

Well Completion Reports associated with wells located within two miles of an area affected or potentially affected by a known unauthorized release of a contaminant will be made available upon request to any person performing an environmental cleanup study associated with the unauthorized release, if the study is conducted pursuant to a regulatory agency order (Water Code Section 13752).

Requests must be made on the form below, signed and submitted to the appropriate DWR District Office. Please provide the township, range, and section of the property where the study is to be conducted. Attach a map or a sketch with a north arrow, and provide as much identifying information requested below as possible; additional paper may be attached if necessary.

By signing below, the requester acknowledges and agrees that, in compliance with Section 13752, the information obtained from these reports will be kept confidential and will not be disseminated, published, or made available for inspection by the public. Copies obtained must be stamped **CONFIDENTIAL** and kept in a restricted file accessible only to authorized personnel. These reports must not be used for any purpose other than for the purpose of conducting the environmental cleanup study.

**To:** Lee Thompson**Subject:** RE: Monitoring wells at 6401 Dublin Blvd

Mr. Thompson:

I am the recent case worker for the site so I can only review past information and give you my impression. 6401 Dublin Blvd is RO459 and 6400 Dublin Blvd is RO2431. These files are available for file review through our file review process, you may call 510-567-6809 for details. Both sites are still active sites and under a groundwater monitoring program. 6401 Dublin Blvd has 3 wells currently being monitored, MW1,3 and 5. Six wells have been decommissioned at the site, MW-8 and MW-9 om 2004 to accomodate the Pinn Bros development and MW2,4,6&7 in 1/06 to accommodate street widening. Are these wells sufficient? I don't think so, but another professional opinion might disagree. Minimally, additional offsite groundwater sampling is necessary to close this site. The two sites are similar in that there were historically elevated levels of MTBE releases to groundwater near or within the tank pits. It appears that there is no longer an ongoing release. What remains is the remnants of a limited release that needs to show attenuation and no risk to offsite receptors. The offsite wells you may be referring to are MW5 and MW6 installed on the northern property boundary of the 6400 Dublin Blvd site, for their investigation which have been decommissioned to accomodate the street widening. You are correct that each site's releasae is similar ie the main release is MTBE, so there may be the potential of commingling plumes. However, consultants might say that the groundwater gradient on 6401 Dublin Blvd is southwesterly and the 6400 Dublin Blvd site is cross gradient. Consultants recommend waiting until late 2006 to determine if offsite wells are necessary. The 6400 Dublin Blvd site has only 3 active wells on the corners of the site and as previously stated appears to have had a release of MTBE that has likely migrated offsite, Either offsite wells or groundwater sampling will be necessary for plume delineation.

That's all I can surmise at this time.

Sincerely,

Barney M. Chan  
Hazardous Materials Specialist  
Alameda County Environmental Health

**Sent:** Wednesday, May 31, 2006 5:24 PM  
**To:** Chan, Barney, Env. Health  
**Cc:** Steven Yee  
**Subject:** Monitoring wells at 6401 Dublin Blvd

Dear Mr. Chan:

I understand that you are out of the office today, and I am going to be out of my office until next Thursday, the 8th. You can contact Steven Yee at our office in my absence at ph 925.833.6630.

The City of Dublin is widening Dublin Blvd along the frontage of the 76 Service Station at the northwest corner of Dublin Blvd and Dougherty Rd. In doing this widening, three monitoring wells are being abandoned as they will be in the future sidewalk. I believe that the Station has at least two more wells on-site and two across Dublin Blvd. in the east bound lanes. There is an additional 76 Service Station opposite the this Station at 6400 Dublin Blvd.

My questions to you are: 1) Is this still an active study site that requires monitoring? and 2) Are the remainder wells sufficient for the monitoring, or do the three abandoned wells needed to be replaced? I'm not sure how you determine which 76 Station is being monitored as the fuels should be of the same composition as they are both

**RE: Workplan Approval for Tosco 76 Station No. 6419 at 6401 Dublin Blvd, Dublin, CA**

Dear Mr. DeWitt:

I have completed review of Gettler-Ryan Inc's August 2001 *Work Plan for Monitoring Well Installation*, prepared for the above referenced site. The proposal to install two off-site groundwater monitoring wells is acceptable. Please provide 72 hours advance notice of field activities.

Be advised, that by September 2001, laboratory data for UST site must be submitted electronically to the SWRCB, and that by January 2002, all groundwater monitoring wells must be surveyed using latitude and longitude to within one meter accuracy.

If you have any questions, I can be reached at (510) 567-6762.

**SUBJECT: NEW LANDOWNER NOTIFICATION AND PARTICIPATION REQUIREMENTS  
FOR 6401 DUBLIN BOULEVARD, DUBLIN, CA**

This letter is to inform you of new legislative requirements pertaining to cleanup and closure of sites where an unauthorized release of hazardous substance, including petroleum, has occurred from an underground storage tank (UST). Section 25297.15(a) of Ch. 6.7 of the Health & Safety Code requires the primary or active responsible party to notify all current record owners of fee title to the site of: 1) a site cleanup proposal, 2) a site closure proposal, 3) a local agency intention to make a determination that no further action is required, and 4) a local agency intention to issue a closure letter. Section 25297.15(b) requires the local agency to take all reasonable steps to accommodate responsible landowners' participation in the cleanup or site closure process and to consider their input and recommendations.

For purposes of implementing these sections, you have been identified as the primary or active responsible party. Please provide to this agency, within twenty calendar days of receipt of this notice, a complete mailing list of all current record owners of fee title to the site. You may use the enclosed "list of landowners" form (sample letter 2) to comply with this requirement. If the list of current record owners of fee title to the site changes, you must notify the local agency of the change within 20 calendar days from when you are notified of the change.

If you are the sole landowner, please indicate that on the landowner list form. The following notice requirements do not apply to responsible parties who are the sole landowner for the site.

In accordance with Section 25297.15(a) of Ch. 6.7 of the Health & Safety Code, you must certify to the local agency that all current record owners of fee title to the site have been informed of the proposed action before the local agency may do any of the following:

- 1) consider a cleanup proposal (corrective action plan)
- 2) consider a site closure proposal
- 3) make a determination that no further action is required
- 4) issue a closure letter

Dave DeWitt  
re: 6401 Dublin Blvd, Dublin, CA  
June 3, 1999  
Page 2 of 2

You may use the enclosed "notice of proposed action" form (sample letter 3) to comply with this requirement. Before approving a cleanup proposal or site closure proposal, determining that no further action is required, or issuing a closure letter, the local agency will take all reasonable steps necessary to accommodate responsible landowner participation in the cleanup and site closure process and will consider all input and recommendations from any responsible landowner.

If you have any questions, I can be reached at (510) 567-6762.

**RE: Workplan Approval for 6401 Dublin Blvd, Dublin, CA**

Dear Mr. DeWitt:

I have completed review of Gettler-Ryan Inc's March 1999 *Work Plan for Monitoring Well Installation* prepared for the above referenced site. The proposal to install four groundwater monitoring wells to delineate the extent of the contaminant plume downgradient of Well MW-1 is acceptable. Soil and groundwater samples will be analyzed for TPHg, BTEX, and MTBE by EPA Methods 5030/8015/8020. Groundwater will also be analyzed for MTBE using Method 8260. Other potential gasoline oxygenates should also be quantified with Method 8260.

In addition to the above soil analyses, a soil sample should be collected from the vadose zone and quantified for total organic carbon content, porosity, bulk density, and water content. These soil parameters can be used in the preparation of a risk assessment, if deemed necessary, in the future.

Field work should commence within 60 days of the date of this letter. Please notify this office at least 72 hours prior to the start of field activities. If you have any questions, I can be reached at (510) 567-6762.

Re: Review of maintenance work  
Tosco/76 Products Service Station # 6419  
6401 Dublin Blvd.  
Dublin, CA

Dear Ms. Chu:

This memo serves as an update on the work completed at the site by Armour Petroleum since the time of the last update (9-24-98 by Tina Berry). This work was conducted between November 17, 1998 and November 25, 1998. Prior to this time, work of a similar nature was done by Gettler-Ryan, Inc and is documented in that earlier report.

During this time period, the following problems were identified and corrected:

- Unused (and unsealed) conduit penetrations from the Bravo Boxes were identified and properly sealed.
- Fill adapter gaskets and dry-break connectors were replaced.
- All turbine sumps and fill sumps were extended vertically approximately 12", and then sumps sealed by injected chemical foam.
- Fill adapters were loose (probably loosed by delivery personnel); tightened and secured with setscrews.
- Over-spill boxes not properly tightened and torn or poorly sealed bellows were identified and repaired.
- Annular spaces had significant LEL levels (> 90% LEL); these spaces were repeatedly purged. Annular space monitor conduit re-sealed at riser. After work completed, only low levels of hydrocarbons found in the annular space (400 – 1100 ppm; 10% LEL is 14,000 ppm)
- Significant levels of hydrocarbons (> 80% LEL) repeatedly found near annular space manhole area backfill. The occurrence of vapor in this location is **not fully understood** (i.e., movement of vapor, source of vapor, etc.).
- Following these repairs, the site underwent a full Gilbarco field performance test for VaporVac systems. All dispensers passed.

This review is obviously abbreviated from the daily worksheets.

As this point, we will be waiting to see the results of the most recent monitoring and sampling event to see if these repairs have made a appreciable change in the levels of dissolved MtBE in the groundwater.

If you have any questions or concerns of this information, please feel free to call me at 925-277-2384.

Sincerely,

David B. De Witt  
Environmental Project Manager

RE: Additional Downgradient Monitoring Well at 6401 Dublin Blvd, Dublin, CA

*3/17/99 dewitt says they investigated facility operation, found some problems + will summarize findings. Told dewitt to have G-R incorporate possible SBS into wp for add'l well. Vapors in annular space - not know where it comes from.*

Dear Ms. Berry:

Thank you for the submittal of the semi-annual 1998 groundwater monitoring report and documentation of your latest efforts to address the rising MTBE concentrations detected in groundwater at the above referenced site. The reports have been reviewed and it appears the transport route of MTBE to groundwater has not been determined.

At this time, an additional groundwater monitoring well should be installed further downgradient of groundwater monitoring well MW-1. It is recommended that this well be installed southwest of the dispenser island. Please submit a workplan which includes the proposed location of the new well.

If you have any questions, I can be reached at (510) 567-6762.

**Comments:** Note: Include UST manifest w/report.  
550-gallon double walled fiberglass waste oil UST removed. Tank was reportedly installed in 1993. No odors or staining were noted in <sup>soil</sup> pit encountered beneath the pea gravel & no staining in the pea gravel. However, view of native soil was limited. Dispensers, islands, and piping were also removed. The three dip tanks located SW of w/o UST & MW-1 were excavated & no apparent odors or staining noted. Dave Malone w/Comp Pacific reported there were no odors & staining in pipe trenches or other 3 dispensers. A soil sample was not collected from w/o UST due to limitations in obtaining representative sample with <sup>out</sup> destroying gas USTs & MW-1. Also, pit was sampled in 1993.

Advise: MW-1 should be analyzed for w/o constituents during next quarterly sampling event. Evaluator will notify Inspector: \_\_\_\_\_

13. Have tanks or pipes leaked in the past? Yes [ ] No [ ] Unknown [X]

If yes, describe. \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

14. Describe methods to be used for rendering tank(s) inert:

TRIPLE RINSE, DRY ICE

Before tanks are pumped out and inerted, all associated piping must be flushed out into the tanks. All accessible associated piping must then be removed. Inaccessible piping must be permanently plugged.

The Bay Area Air Quality Management District, 415/771-6000, along with local Fire and Building Departments, must also be contacted for tank removal permits. Fire departments typically require the use of a combustible gas indicator to verify tank inertness. It is the contractor's responsibility to bring a working combustible gas indicator on-site to verify that the tank is inert.

15. Tank History and Sampling Information \*\*\* (see instructions) \*\*\*

Tank		Material to be sampled (tank contents, soil, groundwater)	Location and Depth of Samples
Capacity	Use History include date last used (estimated)		
520 GAL. Waste oil	IN USE NOW	soil, and groundwater if encountered	One soil sample from surface soil 1-2' below fill end of tank

One soil sample must be collected for every 20 linear feet of piping that is removed. A ground water sample must be collected if any ground water is present in the excavation.

**Excavated/Stockpiled Soil**

Stockpiled Soil Volume (estimated)	Sampling Plan
------------------------------------	---------------

Stockpiled soil must be placed on bermed plastic and must be completely covered by plastic sheeting.

Will the excavated soil be returned to the excavation immediately after tank removal?  yes  no  unknown

If yes, explain reasoning \_\_\_\_\_

If unknown at this point in time, please be aware that excavated soil may not be returned to the excavation without prior approval from Alameda County. This means that the contractor, consultant, or responsible party must communicate with the specialist IN ADVANCE of backfilling operations.

16. Chemical methods and associated detection limits to be used for analyzing samples:

The Tri-Regional Board recommended minimum verification analyses and practical quantitation reporting limits should be followed. See attached Table 2.

17. Submit Site Health and Safety Plan (See Instructions)

Contaminant Sought	EPA or Other Sample Preparation Method Number	EPA or Other Analysis Method Number	Method Detection Limit
TPH-G	GCRD (5030) (3550)		
TPH-D			
BTEX + MTBE	8020		
TOG	5520 D+F		
HVOCs	8010		
SVOCs	8270		
Metals Cd, Cr, Pb, Ni, Zn	ICAP 02AA		

18. Submit Worker's Compensation Certificate copy

Name of Insurer \_\_\_\_\_

19. Submit Plot Plan **\*\*\* (See Instructions) \*\*\***

20. Enclose Deposit (See Instructions)

21. Report any leaks or contamination to this office within 5 days of discovery.

The written report shall be made on an Underground Storage Tank Unauthorized Leak/Contamination Site Report (ULR) form.

22. Submit a closure report to this office within 60 days of the tank removal. The report must contain all information listed in item 22 of the instructions.

23. Submit State (Underground Storage Tank Permit Application) Forms A and B (one B form for each UST to be removed) (mark box 8 for "tank removed" in the upper right hand corner)

I declare that to the best of my knowledge and belief that the statements and information provided above are correct and true.

I understand that information, in addition to that provided above, may be needed in order to obtain approval from the Environmental Protection Division and that no work is to begin on this project until this plan is approved.

I understand that any changes in design, materials or equipment will void this plan if prior approval is not obtained.

I understand that all work performed during this project will be done in compliance with all applicable OSHA (Occupational Safety and Health Administration) requirements concerning personnel health and safety. I understand that site and worker safety are solely the responsibility of the property owner or his agent and that this responsibility is not shared nor assumed by the County of Alameda.

Once I have received my stamped, accepted closure plan, I will contact the project Hazardous Materials Specialist at least three working days in advance of site work to schedule the required inspections.

FROM: Ron Jacobs

JOB #: 1691.30

TOTAL PAGES: 7 (including this sheet)

REFERENCE: Unocal - 6401 Dublin Blvd., Dublin

MESSAGE: Don,

Please find attached the completed Tank Closure Plan application form for the above referenced Unocal project. We are removing a waste oil tank at this site. The city of Dublin is requiring some sort of letter from your jurisdiction in order for us to pull our demolition permit. We are trying to pull the permit on Monday (9/16). We have been corresponding with Rob Weston on this project, he said you could help us out with this.

Please contact me asap to discuss.

Thanks,  
Ron Jacobs

**RE: Use of ORC in Groundwater Monitoring Wells**

Dear Mr. Ralston:

I have received information from Regenesys, who developed the Oxygen Release Compound (ORC) remediation technology, that it is not recommended to purge monitoring wells with ORC prior to sampling. Purging would remove dissolved oxygen, thus defeating the purpose of using ORC.

Several UNOCAL sites are currently using ORC in some of the groundwater monitoring wells. Those wells which have ORC installed should not be purged prior to sampling. Sites employing ORC are:

1. Unocal Service Station # 5366, at 7375 Amador Valley Blvd, Dublin (StID 3169);
2. Unocal Service Station #7176, at 7850 Amador Valley Blvd, Dublin (StID 4104);
3. Unocal Bulk Plant #0362, at 3357 Gardella Plaza, Livermore (StID 3376); and
4. Unocal Service Station #0746, at 3943 Broadway, Oakland (StID 1119); and
5. Unocal Service Station #6419, at 6401 Dublin Blvd, Dublin (StID 2096).

If you have any questions, I can be reached at (510) 567-6762.

**Subject: QMR for Unocal Service Station #6419, 6401 Dublin Blvd,  
Dublin, CA 94568**

Dear Mr. Ralston:

I have completed review of KEI's April 1994 Preliminary Ground Water Investigation at the above referenced site. This report summarizes the installation of three groundwater monitoring wells. It appears contaminated soil was removed to the extent possible. This office concurs with KEI's recommendation to implement a monitoring and sampling program for the wells. Groundwater should be monitored on a monthly basis and sampled on a quarterly basis. Groundwater should be analyzed for TPH-G, TPH-D, and BTEX. Quarterly reports are due 45 days after field activities. The next sampling event should be in June 1994.

If you have any questions, I can be reached at (510) 271-4530.

Sincerely,

Hazardous Materials Specialist

**Subject: Workplan Approval for Unocal Service Station #6419,  
6401 Dublin Blvd., Dublin, CA 94568**

Dear Mr. Ralston:

I have completed review of KEI's January 1994 Work Plan/Proposal for the installation of three groundwater monitoring wells at the above referenced site. The workplan is acceptable and field work should commence within 60 days of the date of this letter. Laboratory analysis of groundwater in the down-gradient well, most likely MW-1, should also be analyzed for TPH-D and the five metals, Cd, Cr, Pb, Ni, and Zn.

Please notify this office at least 72 hours prior to the start of field work. If you have any questions, I can be reached at the above number.

Sincerely

**Subject: SWI for Unocal Service Station #6419, 6401 Dublin  
Blvd., Dublin, CA 94568**

Dear Mr. Ralston:

I have completed review of KEI's October 1993 Soil Sampling Report for the above referenced site. When three underground storage tanks (USTs) were removed in September 1993, soil samples collected from native soil beneath the USTs exhibited low levels of TPH-G and BTEX. However, groundwater grab samples collected after the pit was purged of 7,000 gallons of water exhibited 2,600 ppb TPH-G and 33 ppb benzene. Another water sample was collected a few days later, after another 12,000 gallons of water was purged from the pit, and exhibited 740 ppb TPH-G and 14 ppb benzene.

At this time, additional investigations are required to determine the extent and severity of water contamination beneath the site. I concur with KEI's recommendation to install three monitoring wells for this investigation. Please submit a workplan proposal for the work intended **within 45 days** of the date of this letter.

If you have any questions, please contact me at (510) 271-4530.

Soil + H<sub>2</sub>O

\* Calif. Administration Code (CAC) or the Health & Safety Code (HS&C)

**Comments:**

(Water + Soil Sampling From PIT)

THE BACK FILL BEING REMOVED HAS HEAVY VISUAL + ODOUR SIGNS OF PETROLEUM CONTAMINATION. ALL THE BACK FILL IS BEING REMOVED BEFORE SOIL + H<sub>2</sub>O SAMPLES ARE TAKEN

ALTHOUGH THE FILL SOIL INTERFACE APPEARS CONTAMINATED, B-12" INTO NATIVE SOIL SHOWS NO APPARENT ODOUR OF PETROLEUM. THIS SOIL IS EXTREMELY TIGHT MARSH CLAY.

Comments:

Removal

Hauler: Erickson - #402963 Exp. 5/94

2- 10K Gasoline Tanks + 1-500 Gallon waste oil Tank

PT
----

There is a SLIGHT TO MODERATE odor ~~coming from~~ of Gasoline. THE FILL SHOWS SIGNS of Petroleum Contamination (PHOTO). THE PT WILL BE "DRESSED UP" AND THE GROUND H<sub>2</sub>O PUNGED BEFORE A H<sub>2</sub>O Sample is taken. THE 2<sup>nd</sup> Gasoline Tank WAS REMOVED AND SHOWED SIGNS OF Gasoline Contamination. THE oil/Grease FLOATING on the H<sub>2</sub>O is from the Tank w/ ~~underneath~~ the Tanks. ALL BACK FILL will be removed before soil AND H<sub>2</sub>O Samples are taken. NO Affluent holes detected in either Tank. THE TANKS SHOW SIGNS OF RUST.

Comments:

Pipeline Soil Samples  
Soil Samples will be taken UNDER each Area  
where an old Dispenser was located. Also, soil samples  
1-20 linear FEET.

WASTE OIL TANK: 1-500 Gallon waste oil  
Tank - This Tank FAILED it's LAST integrity TEST in 1993.  
THERE IS OBVIOUS SOIL Contamination from the  
Waste oil. THE TANK SHOWS SIGNS OF RUST.  
THE BACKFILL MATERIAL is contaminated w/ waste oil

Pipeline Sampling
