Nevdeep,

Below is a schedule of the activities related to the soil borings.

Tomorrow August 9, 2012 starting at 8:30 am – a geophysical survey will be conducted onsite to locate any utilities. We will use tape on the floor to mark the location of any utilities we may find inside the station building. If you could please leave the tape in place until after we complete the borings, it would be appreciated. We will remove the tape from the floor once the drilling activities are completed. Outside the building, spray paint will be used to mark the locations of any utilities.

Thursday August 16, 2012 and Friday August 17, 2012 starting at 7:am – We will conduct the soil borings. We would like to start with the borings inside the station building. Once the borings inside the building are complete we will start the borings outside the building.

Thanks,

**Nathan Lee, P.G.**
