Brian,

As discussed in our meeting of March 17, 2014, ACEH has extended the submittal date contained in the Notice to Comply by one month (See attached ENF_L_2014-03-10). The site timeline, diesel source evaluation, and travel time analysis is now due April 24, 2014. The submittal date applies to submittals from all responsible parties.

As also discussed in the meeting, groundwater monitoring and sampling at the site is requested to continue. A review of the case file indicates that the next groundwater monitoring event was due in February 2014. Can you confirm groundwater monitoring and sampling occurred at that time, or confirm the date groundwater sampling will occur by?
Thanks,

*Mark Detterman
