

TANK CLOSURE REPORT FOR REMOVAL OF
UNDERGROUND STORAGE TANKS (UST'S)
NOS. B-732-1 & B-732-2
CAMP PARKS, DUBLIN, CALIFORNIA
JULY 1993

Prepared by:

Navy Public Works Center, San Francisco Bay
Environmental Group, Code 614
Oakland, California

In consultation with:

Alameda County Health Care Services,
Hazardous Material Division,
Oakland, California

TANK CLOSURE REPORT FOR REMOVAL
OF UNDERGROUND STORAGE TANKS (UST'S)
NOS. B-732-1 & B-732-2
CAMP PARKS, DUBLIN, CALIFORNIA

CERTIFICATION

I hereby certify that I have examined the Underground Storage Tank (UST) sites to be closed and having reviewed the requirements for tank closure of UST #'s B-732-1 and B-732-2 at Camp Parks, Dublin, California believe that the attached closure report has been prepared in accordance with good engineering practices.

TANK CLOSURE REPORT
FOR REMOVAL OF TANKS NOS. B-732-1 AND B-732-2 LOCATED AT
CAMP PARKS, DUBLIN, CALIFORNIA

I. TANK CLOSURE REPORT:

A. Closure Activities: The closure activities were performed in accordance with the tank closure work/health and safety plan.

B. Conditions of Tanks, Fittings and Piping:

1. Tanks Nos. B-732-1 and B-732-2: Tank No. B-732-1 was an 18,000 gallon gasoline tank and Tank No. B-732-2 was a 1,000 gallon waste oil tank installed in 1942. Upon removal, no holes or corrosion pits were found due to the external tank asphalt coatings which protected both tanks. The fittings and piping buried in gravel and clay were also in good condition.

C. Site Excavation:

1. Tank No. B-732-1: 18,000 gallon gasoline UST

- a. A 35 ft x 30 ft x 14 ft deep excavation using a backhoe was completed to loosen and remove the 10 ft diameter tank (plus 2 1/2 ft long fill pipes). The tank was removed with a 45 ton crane.
- b. The native soil of the excavation side wall was composed of slightly sandy silt with mostly clay from ground surface to the ground water level about 13 ft from the surface.
- c. There were no root holes or potential contaminant pathways encountered during the excavation.
- d. The observed groundwater level was about 13 ft below the ground surface.
- e. No streaks or odor bearing soils were encountered.
- f. During excavation around the tank, the groundwater was found to be free of visible oil sheens.

2. Tank No. B-732-2:

- a. A 12 ft x 8 ft x 8 ft deep excavation was required to remove this 1,000 gallon tank.
- b. The excavated soil was composed of sand, gravel fill and clay.

- c. There were no root holes or potential contaminant pathways encountered during excavation.
- d. During excavation, rain water accumulated to within 6 inch from the ground level.
- e. The excavated wall had a streak of oil on the clay about 1 ft from the ground surface level. The suspected source was from past overfill.
- f. No ground water was observed to enter the pit.

D. Sampling Methods: Soil samples were collected by carefully driving a brass tube measuring 2 x 6 inches into the soil. Both ends of the tube were capped with plastic and sealed by the Eureka Laboratory sampler. Ground water samples from the Tank 732-1 excavation were collected with an extended stick and a bailer bail at its end to allow submerging bailer to fill slowly before capping. All samples were stored in a portable cooler with ice for transporting to the laboratory with completed chain of custody forms.

1. Tank No. B-732-1: Two soil stockpile samples (one each from stockpile #1 and #2, (see sketch #3 for stockpile locations), and one water sample (see sketch # 4) were initially taken. Eight weeks later, three verification samples (two trench wall samples East and West, and one ground water sample from 13 ft below the surface level after groundwater recharge) and 7 piping trench soil samples A1 thru A7 north and 7 soil samples B1 thru B7 south (every 20 linear feet, see sketch #4) were analyzed by a State certified third party laboratory contractor (Eureka Inc.). These results were previously submitted to Alameda County EPA for review which resulted in authorization for backfilling. Another copy of B-732-1 analytical results are included in Appendix 1 of this closure report.

2. Tank No. B-732-2: Three soil samples (one sample from stockpile #3, see sketch #3, and two samples from trench walls North and South, see sketch #4) and two trench rain water samples (one initial and one verification a week later before emptying the tank pit) were taken. Per Alameda County EPA instructions, rain water was to be emptied and no water sample was required from the pit if it did not recharge. The pit did not recharge upon emptying the rain water.

E. Remedial Measures Conducted at the Time of Tank Removals:

1. Tanks Nos. B-732-1 and B-732-2: No remedial measures were conducted at these sites other than the removal of these two tanks and associated piping.

F. To-Scale Sketch of Excavation Work Site, Sample Location and Previous Plot Plan:

1. Tanks Nos. B-732-1 and B-732-2:
 - a. For work site, see sketch #1.
 - b. For copy of plot plan, see sketch #2.
 - c. For sampling locations, see sketches #3 and #4.

G. Chain of Custody Records:

1. Tanks Nos. B-732-1 and B-732-2:
 - a. For chain of custody records, see Appendix 1.

H. Copies of Signed Laboratory Reports:

1. Tanks Nos. B-732-1 and B-732-2:
 - a. For copies of laboratory reports, see Appendix 1.

I. "TSDF to Generator" Manifest for All Hazardous Waste Hauled Off-site:

1. See Appendix 2.

J. Tabulation of All Non Manifested Contaminated Soil Hauled Off-site:

1. Tanks Nos. B-732-1 and B-732-2:
 - a. No contaminated soil was hauled off-site.

II. Action, Conclusion and Recommendations:

A. Tanks No. B-732-1:

The initial and the verification test results of the groundwater and soil samples from the excavation trench of the 18,000 gallon tank No B-732-1 including all associated piping excavation indicated no significant contamination. Through an earlier request, a copy of these analytical results were submitted

to the Alameda County EPA office whereby permission to backfill was granted since the test results indicated no significant contamination of TPH purgable, TPH extractable, BTEX or metals in stockpiled soil or groundwater was noted. Trench B-732-1 was backfilled with existing clean stockpiled soil and new soil to prevent further trench erosion. Table 1 presents a summary of analytical results showing no significant contamination.

B. Tank No. B-732-2 (1,000 gals):

1. The source of soil/water contamination appears to have been due to a past overfill. A leak, perhaps from the old pipe joints, appears less likely due to the good condition of piping/tank removed. However, per request by Alameda County EPA, a complete investigation of the trench was done by emptying the rain water and taking soil samples 2 ft below the bottom surface of the tank removed. Table 2 presents a summary of analytical results showing no significant contamination.

C. Recommendations:

Based on the above, no significant contamination remains. Therefore, upon approval of this closure report by Alameda County EPA, the smaller pit No. B-732-2 will be backfilled using new, uncontaminated soil, the remaining soil stockpiled will be properly disposed and this site will be closed.

TABLE 1

SUMMARY OF ANALYTICAL RESULTS FOR SOIL AND WATER TESTED FOR LEAD, PURGEABLE AROMATICS AND TOTAL PETROLEUM HYDROCARBONS FOR TANK NO. B-732-1 (18,000 GALS) AND ITS ASSOCIATED PIPING.

INITIAL WATER SAMPLE

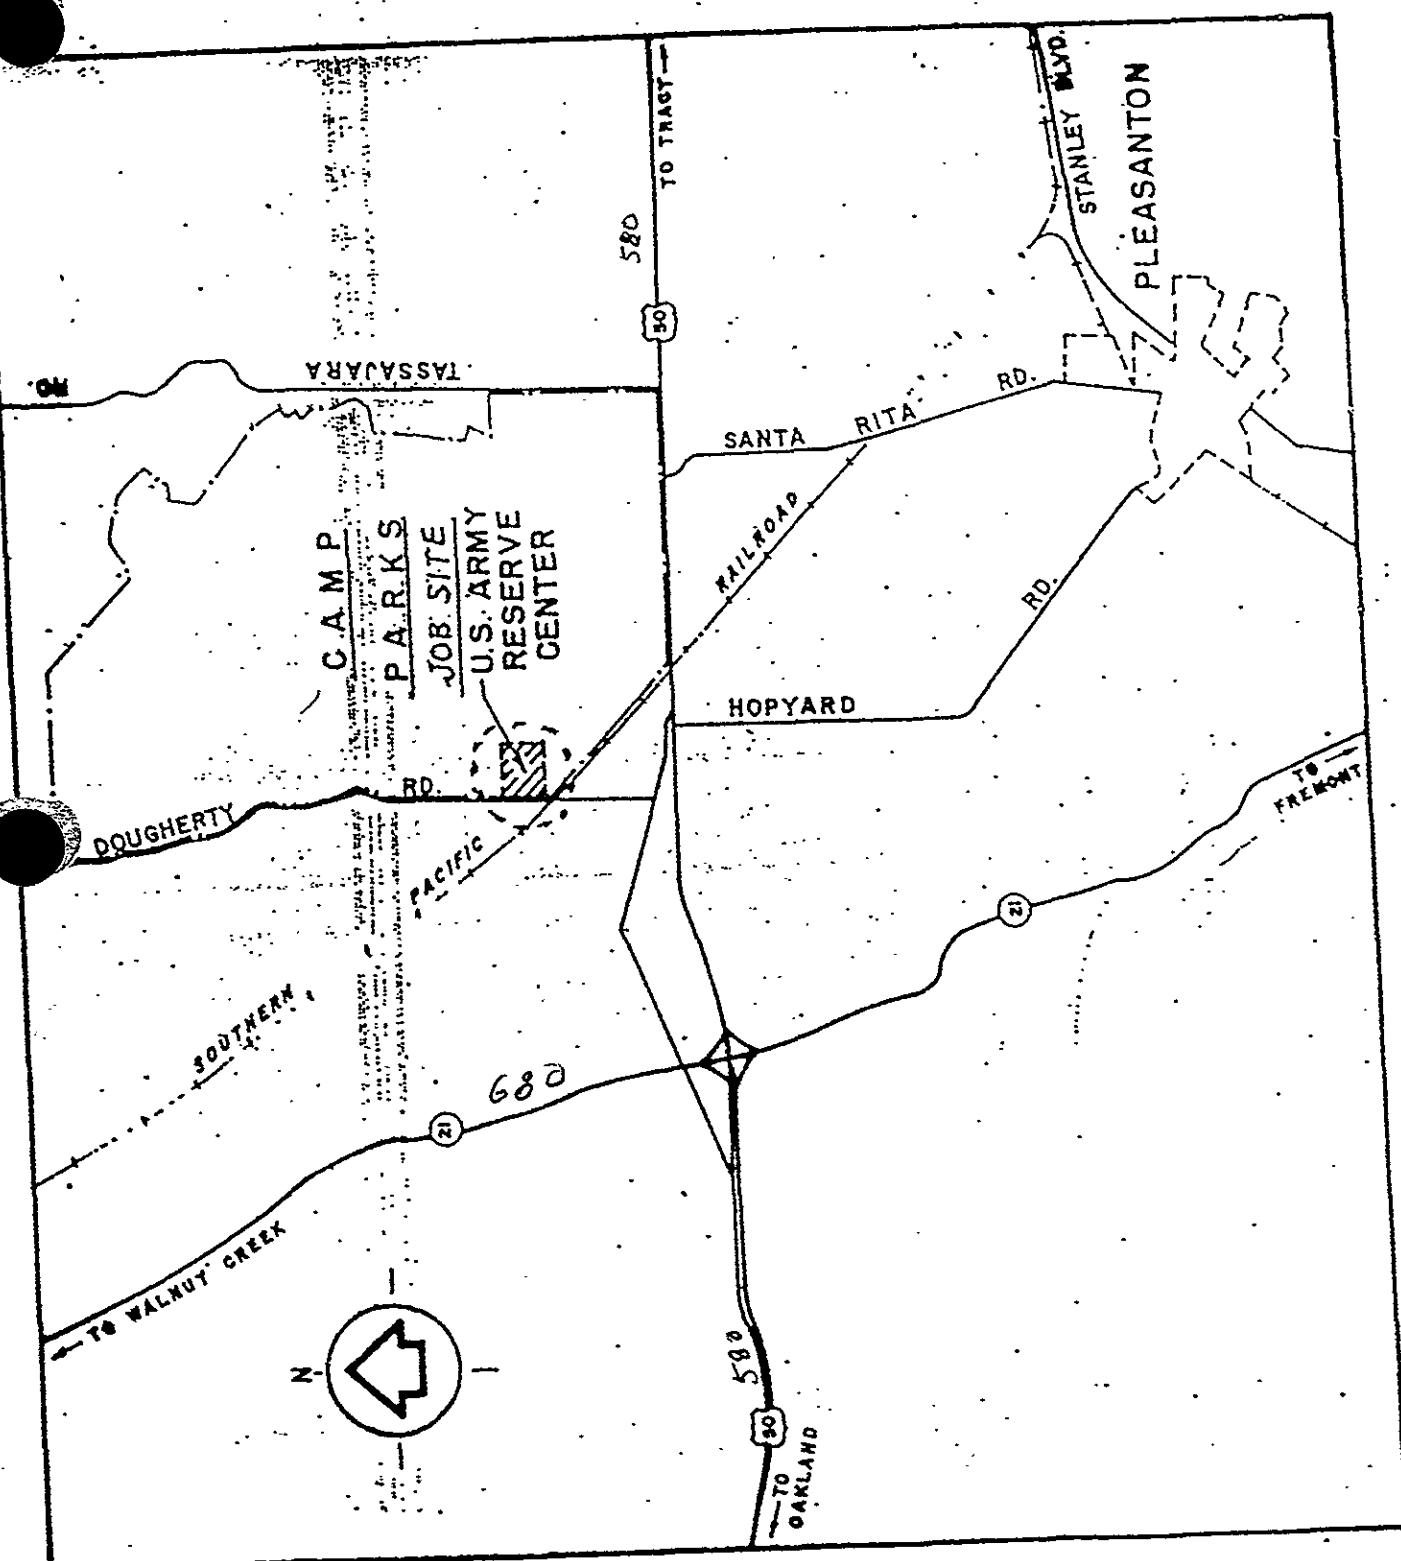

| | | | | |
|---------|-----------|-----------|--|--|
| 2/23/93 | Pit 732-2 | 93-02-208 | Chromium Zinc Lead Ethyl Benzene Toluene Xylene TPH-G TPH-D | .007 .085 .054 .196 .118 .939 13.5 36.4 |
|---------|-----------|-----------|--|--|

FINAL WATER SAMPLE

| | | | | |
|--------|-----------|-----------|------|------|
| 5/3/93 | Pit 732-2 | 93-05-012 | Zinc | .02 |
| 5/6/93 | Pit 732-2 | 93-05-071 | None | None |

Note:

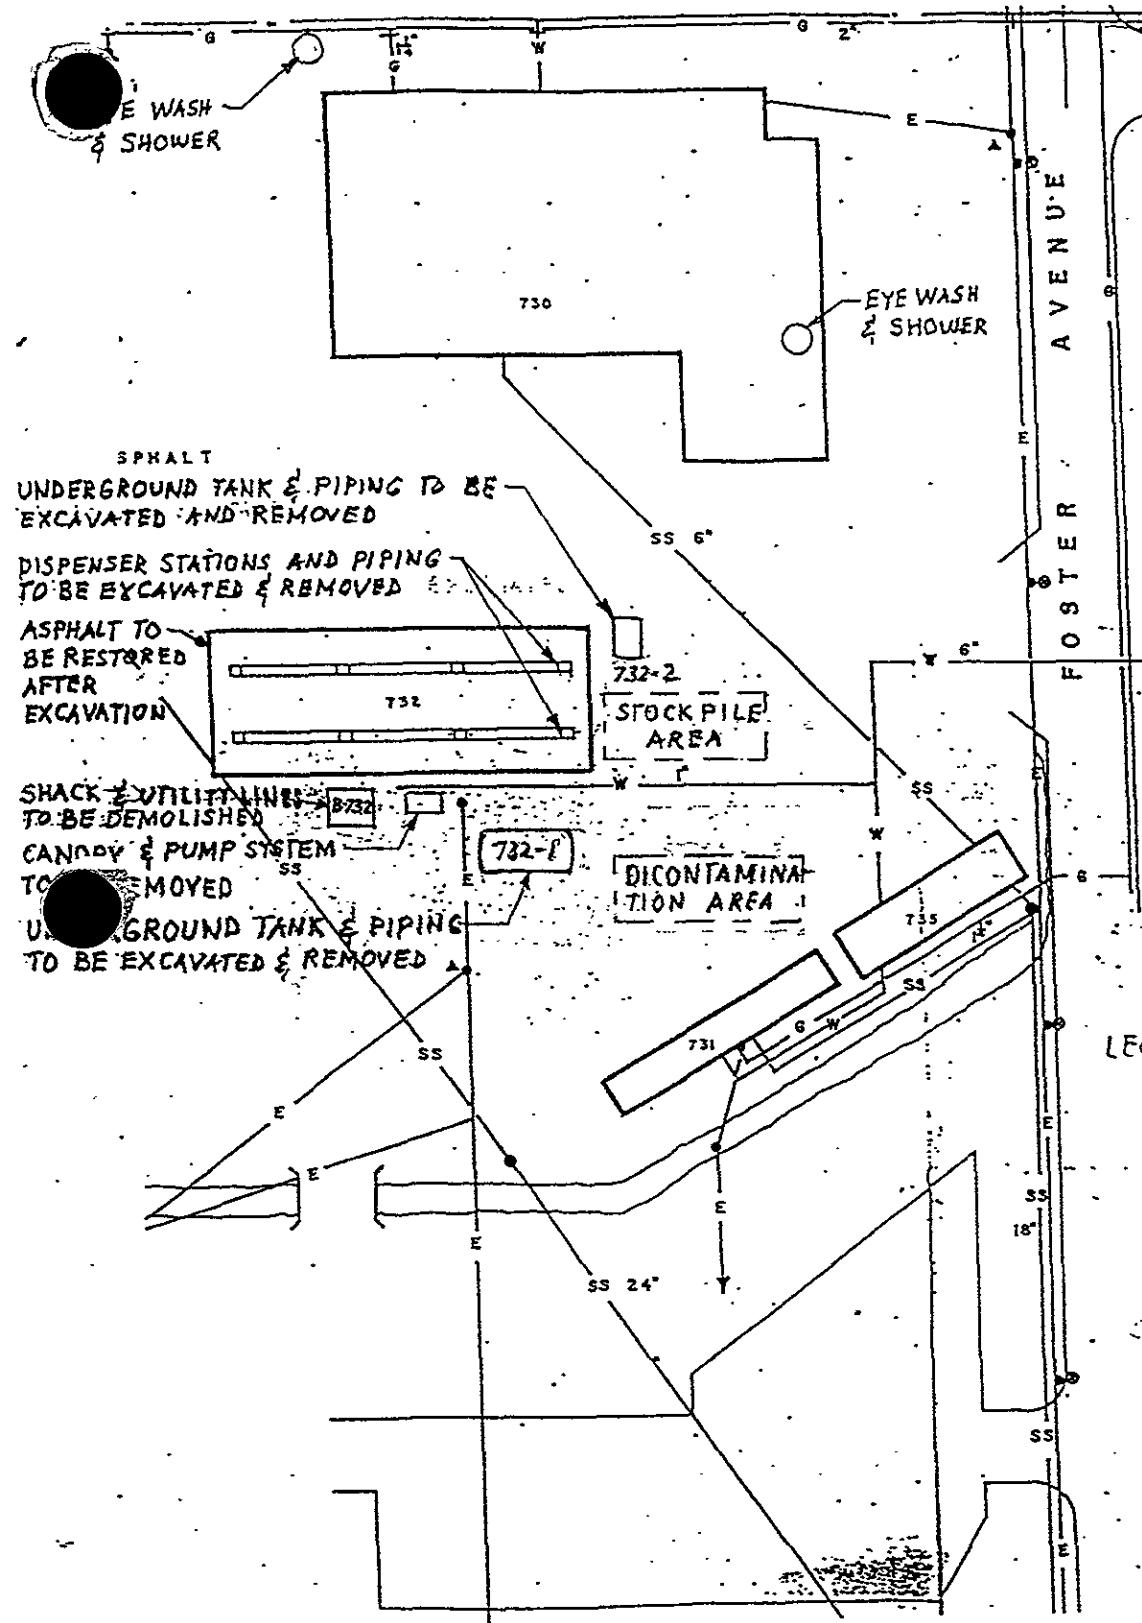

1. 1A South and 1A North samples (soil from the tank pit) were tested for O&G, Lead, Purgeable Aromatics, TPH and Chlorinated Hydrocarbon. Samples were taken again at the same location on 5/14/93 for verification.
2. Stockpile 3A,B,C,D Composite sample (soil from the excavation) was tested for Metals, Total Recoverable Petroleum Hydrocarbons, Purgeable Aromatics, TPH and Chlorinated Hydrocarbons. The stockpiled soil was placed on and covered by plastic. This soil will be disposed in accordance with Federal and State regulations.
3. The initial water sample Pit 732-2 (water from the pit after the tank was removed) and the final water samples (verified before disposal) were tested for Metals, Purgeable Aromatics and TPH.
4. Water sample Pit 732-2 which was taken on 5/3/93 was tested for Chlorinated Hydrocarbon, O&G, Metals and Purgeable Aromatics.
5. Water sample from pit 732-2 which was taken on 5/6/93 was tested for TPH and Purgeable Aromatics.

\* Reagent spike set is used due to matrix interference.

\*\* The matrix spike used in this analysis is from another sample of the same analytical batch. However, due to high analyte concentration in the matrix spike sample, the reagent spike sample is reported.

\*\*\* This set of matrix spike is from another sample of the same matrix and of the same analytical batch.

\* This set of matrix spike is from another sample of the same matrix and of the same analytical batch.

\*\* Reagent spike set is used due to matrix interference.

\*\*\* Reagent spike was used due to high analyte concentration.

▲ The matrix spike used in this analysis is from another sample of the same analytical batch. However, due to matrix interference in the matrix spike sample, the reagent spike sample is reported.

### Inspection Categories:

- I. Haz. Mat/Waste GENERATOR/TRANSPORTER
- II. Business Plans, Acute Hazardous Materials
- III. Underground Tanks

• Calif. Administration Code (CAC) or the Health & Safety Code (HS&C)

### Comments:

172-1  
WATER from the large pit was removed by H&H environmental Services. Sampling of the trench, where pipeline was removed, is not possible. The trench is filled with native soil. However, there is a sufficient amount of native soil which was removed from each pipeline trench to sample.

PIPELINE Soil Samples: 1 sampled 20FT. Measured From EAST END of ~~the~~ Pipeline Diesel pipeline

|                |        |
|----------------|--------|
| 732-A1 - 20 ft | 732-B1 |
| " A 2 - 40 "   | " B2   |
| " A 3 - etc.   | " B3   |
| " A 4 -        | " B4   |
| " A 5 -        | " B5   |
| " A 6 -        | " B6   |
| " A 7 -        | " B7   |

The diesel pipeline samples were taken w/ JAKS because the samples did NOT have enough bust sticks.
