Re: **Proceed with Work Plan for Onsite Characterization**
Former ARCO Service Station
706 Harrison Street, Oakland, California
Fuel Leak Case No. RO0000484
CRA Project No. 231116

Dear Ms. Drogos:

On behalf of Mr. Bo Gin, Conestoga-Rovers & Associates, Inc. (CRA) is notifying Alameda County Environmental Health (ACEH) that we are proceeding with preparation of a *Work Plan for Onsite Characterization* as recommended in Cambria's January 12th and 24th, 2007 correspondence (attached) and quarterly monitoring reports. This is in accordance with the "60-day rule" presented in California Code of Regulations, Title 23, Division 3, Chapter 16, Underground Tank Regulations. The rationale for producing a *Work Plan for Onsite Characterization* is to determine if a significant source still exists on the site, perform remediation if necessary, and move the project forward to achieve regulatory closure. The site also appears to be significantly impacted by an upgradient property. To date, we have not received a response from ACEH on our January 2007 request presented in the attached letters

Please call me at 510/420-3307 if you have any questions regarding this correspondence or the project.

Sincerely,

Conestoga-Rovers & Associates, Inc.

Mark Jonas, P.G.
Senior Project Manager

Attachments: January 12, 2007 Cambria letter to ACEH *Request for Approval of Onsite Characterization*.
January 24, 2007 Cambria letter to ACEH *Request for Approval for Onsite Characterization and ACEH Pursuit of Remediation at Upgradient Site*.
