RE: Former BP Oil Site No. 11107
18501 Hesperian Boulevard (at Bockman)
San Lorenzo, CA
STID 780

Dear Mr. Oliva:

Enclosed find the 5 February 1998 Groundwater Monitoring and Sampling Report prepared on behalf of BP by Alisto Engineering Group.

The petroleum release at this site was documented during 1992 when BP performed a site assessment in support of plans to withdraw from the California retail market.

The enclosed report shows the aromatic petroleum hydrocarbons were detected in samples obtained from two of the seven wells sampled on 8 December 1997. The highest benzene concentration (11 ug/l) was detected in a sample obtained from well MW-4. MTBE was also detected in samples obtained from wells MW-4,5,6, and 7.

Plans for the next quarter include groundwater monitoring and sampling. Since petroleum hydrocarbon concentrations reported for wells MW-1, MW-2, and MW-3 appear to be very low or non-detected, it appears that chemical data from these wells is providing little beneficial information. We plan to sample these three well on an annual basis at this time.

Please give me a call at (425) 251-0689 if you have any comments or questions regarding this matter.

Sincerely,

Scott Hooton

GROUNDWATER MONITORING AND SAMPLING REPORT

**BP Oil Company Service Station No. 11107
18501 Hesperian Boulevard
San Lorenzo, California**

Project No. 10-060-07-001

February 5, 1998

INTRODUCTION

This report presents the results of the December 8, 1997 groundwater monitoring and sampling conducted by Alisto Engineering Group at BP Oil Company Service Station No. 11107, 18501 Hesperian Boulevard, San Lorenzo, California. A site vicinity map is shown on Figure 1.

FIELD PROCEDURES

Field activities were performed in accordance with the procedures and guidelines of the Alameda County Health Care Services Agency and the California Regional Water Quality Control Board, San Francisco Bay Region.

Before purging and sampling, the groundwater level in each well was measured from a permanent mark on top of the casing to the nearest 0.01 foot using an electronic sounder. The depth to groundwater and top of casing elevation data were used to calculate the groundwater elevation in each well in reference to mean sea level. The survey data and groundwater elevation measurements collected to date are presented in Table 1.

Before sample collection, each well was purged of 3 casing volumes while recording field readings of pH, temperature, electrical conductivity, and dissolved oxygen. Groundwater samples were collected for laboratory analysis by lowering a bottom-fill, disposable bailer to just below the water level in the well. The samples were transferred from the bailer into laboratory-supplied containers. The water sampling field survey forms are presented in Appendix A.

SAMPLING AND ANALYTICAL RESULTS

The results of monitoring and laboratory analysis of the groundwater samples collected during this and previous quarters are summarized in Table 1. The potentiometric groundwater elevations as interpreted from the results of this monitoring event are shown on Figure 2. The results of laboratory analysis are shown on Figure 3. The laboratory report and chain of custody record are presented in Appendix B. Historical methyl tert butyl ether (MTBE) not previously tabulated is now included in Table 1. Copies of the MTBE laboratory analysis documentation are included in Appendix C of this report only.

LABORATORY REPORT AND CHAIN OF CUSTODY RECORD

HOUSTON LABORATORY
8680 INTERCHANGE DRIVE
HOUSTON, TEXAS 77054
PHONE (713) 660-0901

December 23, 1997

Mr. Scott Hooton
BP OIL COMPANY
295 SW 41st St, Bldg 13 Ste N
Renton, WA 98055

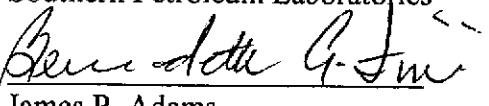

The following report contains analytical results for samples received at Southern Petroleum Laboratories (SPL) on December 12, 1997. The samples were assigned to Certificate of Analysis No.(s) 9712676 and analyzed for all parameters as listed on the chain of custody.

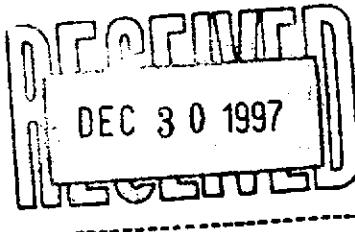

Any data flag or quality control exception associated with this report will be footnoted in the analytical results page(s) or the quality control summary page(s).

If you have any questions or comments pertaining to this data report, please do not hesitate to contact me. Please reference the above Certificate of Analysis No. during any inquiries.

Again, SPL is pleased to be of service to you. We anticipate working with you in fulfilling all your current and future analytical needs.

DATA REVIEW CHECKLIST

BP Site Number: 11107
ERM Contact: H176921
Sampling Date: 12/08/97
Matrix Description: Water
Date Final Report Received: 12/30/97
Laboratory & Location: SPL, Houston, Texas

	Yes	No	N/A
1. Is BP contract release number consistent with analytical report?	<u>X</u>		
2. Was report submitted within the specified timeframe?	<u>X</u>		
3. Does report agree with the COC?	<u>X</u>		
4. Are units consistent with the given matrix?	<u>X</u>		
5. Were any target analytes/compounds detected in blanks (i.e., trip or equipment)?			<u>X</u>
6. Are duplicate water samples within 30%?	<u>X</u>		
7. Are holding times met?	<u>X</u>		
8. Are surrogates within limits using laboratory criteria?	<u>X</u>		
9. Are MS/MSD acceptable using laboratory criteria?	See Below		
10. Are LCS results acceptable using laboratory criteria?	<u>X</u>		

Note:

MS/MSD recovery and relative % difference for MTBE not calculated due to sample exceeding spike by a factor of 4 or more. MS/MSD limits are advisory only; as stated in SW-846, Section 8.7 to 8.8, if the MS/MSD results fall outside the advisable ranges, a laboratory control samples (LCS) must be analyzed and fall within those ranges. LCS results are within quality control limits.

Data Validation Completed by: Brady Nagle
