Subject: RO491 offsite plume
Entry Type: Phone call
Company: Cardno ERI

Start: Wed 3/2/2011 3:43 PM
End: Wed 3/2/2011 4:03 PM
Duration: 20 minutes

Discuss Feb 15th letter with Paula Sime. Once they can get onto the Cal Trans property, they would like to pursue excavating the source area and inject an oxidizer into the area without product but they have to define the plume first. They were wondering if the site could be closed and open a new off-site case but I didn't think that was possible. However, I will talk to Donna about destroying the wells and waiting for the off-site access in 2013 so the free product can be removed.
