Mr. Michael Whelan  
ARCO Products Company  
P.O. Box 5811  
San Mateo, California 94402

**Subject:** First Quarter 1994 Summary Report at ARCO Station 2111, 1156  
Davis Street, San Leandro, California.

Mr. Whelan:

As requested by ARCO Products Company (ARCO), GeoStrategies Inc. (GSI) has prepared this quarterly summary report outlining activities performed during the first quarter 1994 and activities anticipated for the second quarter 1994 at the above referenced site.

The following was performed during the first quarter 1994 at the subject site:

- GSI field personnel supervised the drilling and sampling of two soil borings to evaluate the lateral and vertical extent of hydraulic oil in the soil in the immediate vicinity of the former hydraulic hoist on March 4, 1994.

The activities anticipated for the second quarter 1994 at the subject site include:

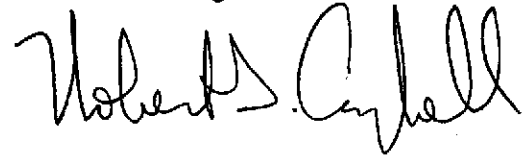

- Submit a report detailing the field methods, findings, and conclusions of the initial subsurface investigation; and
- Submit a work plan for removal and replacement of the existing waste-oil tank.
