Mike,

Thank you for the heads up on the status report. I will review and provide feedback on your proposal when I can get to this case.

Regards,
Jerry Wickham

Subject: RO0498 Report Upload - 1Q11 Status Report

Jerry,
We have uploaded the first quarter status report for 2011 for the San Lorenzo Tesoro site. The groundwater monitoring results have continued to decrease and it looks like the groundwater concentrations are too low for the oxygen injection to continue to be effective. We are proposing to shut down the oxygen injection system and implement the proposed monitoring plan to evaluate the continuing concentration trends in groundwater at the site.

We will keep the oxygen system operating until you have time to review the data and provide feedback. Feel free to contact me with any questions or concerns about the reports.

Thank you,
Mike
