Subject: RE: Former Chevron Station 9-1026 3701 Broadway, Oakland RO 0500 Groundwater Sampling

Mark,

Conestoga-Rovers and Associates on behalf of Chevron Environmental Company, is notifying you that construction activities in the area are still ongoing. These activities prevented Blaine Tech from sampling the monitoring wells during the second and first quarters of 2012. Street closures caused by construction activities funnel traffic into the traffic lanes that require to be closed in order to sample the monitoring wells. Blaine Tech communicated with the construction company and determined that the construction activities should be completed in July of 2012. These wells are sampled annually and will be sampled during the third quarter of 2012. The groundwater report will reflect third quarter data.

Thanks,

Nathan Lee, P.G.

Subject: Former Chevron Station 9-1026 3701 Broadway, Oakland RO 0500 Groundwater Sampling

Mark,

Conestoga-Rovers and Associates on behalf of Chevron Environmental Company, is notifying you that construction activities in the area prevented Blaine Tech from sampling the monitoring wells during the first quarter of 2012. Street closures caused by construction activities funnel traffic into the traffic lanes that require to be closed in order to sample the monitoring wells. Blaine Tech is currently in communication with the construction company and the City of Oakland to determine a day and a time to sample the wells during the second quarter of 2012. As these wells are only sampled annually, the groundwater report will reflect second quarter data instead of first quarter.

Thanks,

Nathan Lee, P.G.
