Subject: RO0505-2350 (2368) Harrison St., Oakland - Using CO2 instead of He as tracer gas in air exchange measurement @ 7-Eleven store ~COR-060119~

Jerry,

Per our conversation this morning, CRA will be using carbon dioxide (CO₂) instead of helium as tracer gas in the air exchange measurement within the 7-Eleven store at the subject site. Helium was originally proposed as the tracer gas in our October 28, 2011 work plan.

We are tentatively scheduled to conduct the air exchange measurements November 19 and 20, 2011.

Regards,

Peter Schaefer, CEG, CHG
