

8/4/93

~~1~~ Dick Barge was requested to send a copy of the permit that was issued to Shell to remove the UGT's in 1977. I told him after we obtain a copy of this permit, our office can write a letter to Shell and attach this copy of their permit and request they perform an investigation.

12-31-92

Sandra of Groundwater Technology said Southland Corp. is not the property owner. She will give me the property owners name when she finds out.

1-27-93

Sandra said the property owner is Dick Buge Development Co., One Kaiser Plaza, #1010 Oakland, CA 94612. Buge purchased the property from Shell Oil. She sent a work plan to Buge for approval that included excavating to a depth of 5' to ~~to~~ install the leach post and to take 4 soil samples at the bottom of the excavation. I said they should also take a core sample down to a depth of 10'. She will add this to her plan and fax it to me.

2-8-93

Left mess.

2-10-93

Left mess.

3-11-93

Went to site and met with Bryan of Harold Nutter & Son Inc. He told me they have already overexcavated the leach post holes, and a bore sample was taken from each hole. Sandra Lindsey was present during boring & sampling.
