Entry Type: Phone call
Start: Wed 1/6/2010 11:00 AM
End: Wed 1/6/2010 11:00 AM
Duration: 0 hours

Phone call with Denis Brown of Shell and Peter Schaefer of CRA regarding 2350 Harrison Street comment letter. We discussed the following;

- Shell and CRA want to use alternate screening levels for soil gas that are based on 10-05 risk. ACEH may consider cleanup levels or NFA levels in this range when site is understood and cumulative risk is considered. Not willing to consider these as screening levels when data quality, site characterization, and cumulative risk are not well understood.
- Having difficulty meeting reporting limits for 1,1,2,2-tetrachloroethane due to interference caused by highly elevated benzene.
- CRA will submit a work plan addendum for subsurface sampling in sidewalk outside the building.
- I will send them list of sites that I am interested in discussing and three dates to meet.
