=====

MESSAGE: Dear Jennifer,

Herewith is the site performance information I requested  
Joel Bursvort to prepare. I would like to know how  
you feel on the vapor extraction operations. It  
is possible to go for closure based on the  
memo issued by Mr. Wall Pettit of SWRCB dated  
Dec. 8, 1995? Or continue the VES operations with  
annual monitoring. Please call me when you  
have the change. Thank you.

Normita

Also, I found your letter dated 12/11/95. Again  
thank you, this will be a big savings for us.

**RE: Site Performance Information  
Pacific Supply Company  
Oakland, California**

Dear Normita:

I have enclosed the information you requested during our telephone conversation on February 2, 1996 regarding closure possibilities for the Pacific Supply Company site located at 1735 24<sup>th</sup> Street in Oakland, California. Three separate graphs have been developed for your review; Graph 1 shows reported concentrations of total petroleum hydrocarbon as gasoline at MW-2 as a function of time, Graph 2 shows reported benzene concentrations at MW-2 as a function of time, and Graph 3 shows cumulative pounds of total petroleum hydrocarbons removed with time.

I welcome the opportunity to meet with Jennifer Eberle and yourself to discuss closure possibilities of the Pacific Supply Company site.

If you have questions please call me at (415) 364-9030.

Sincerely,

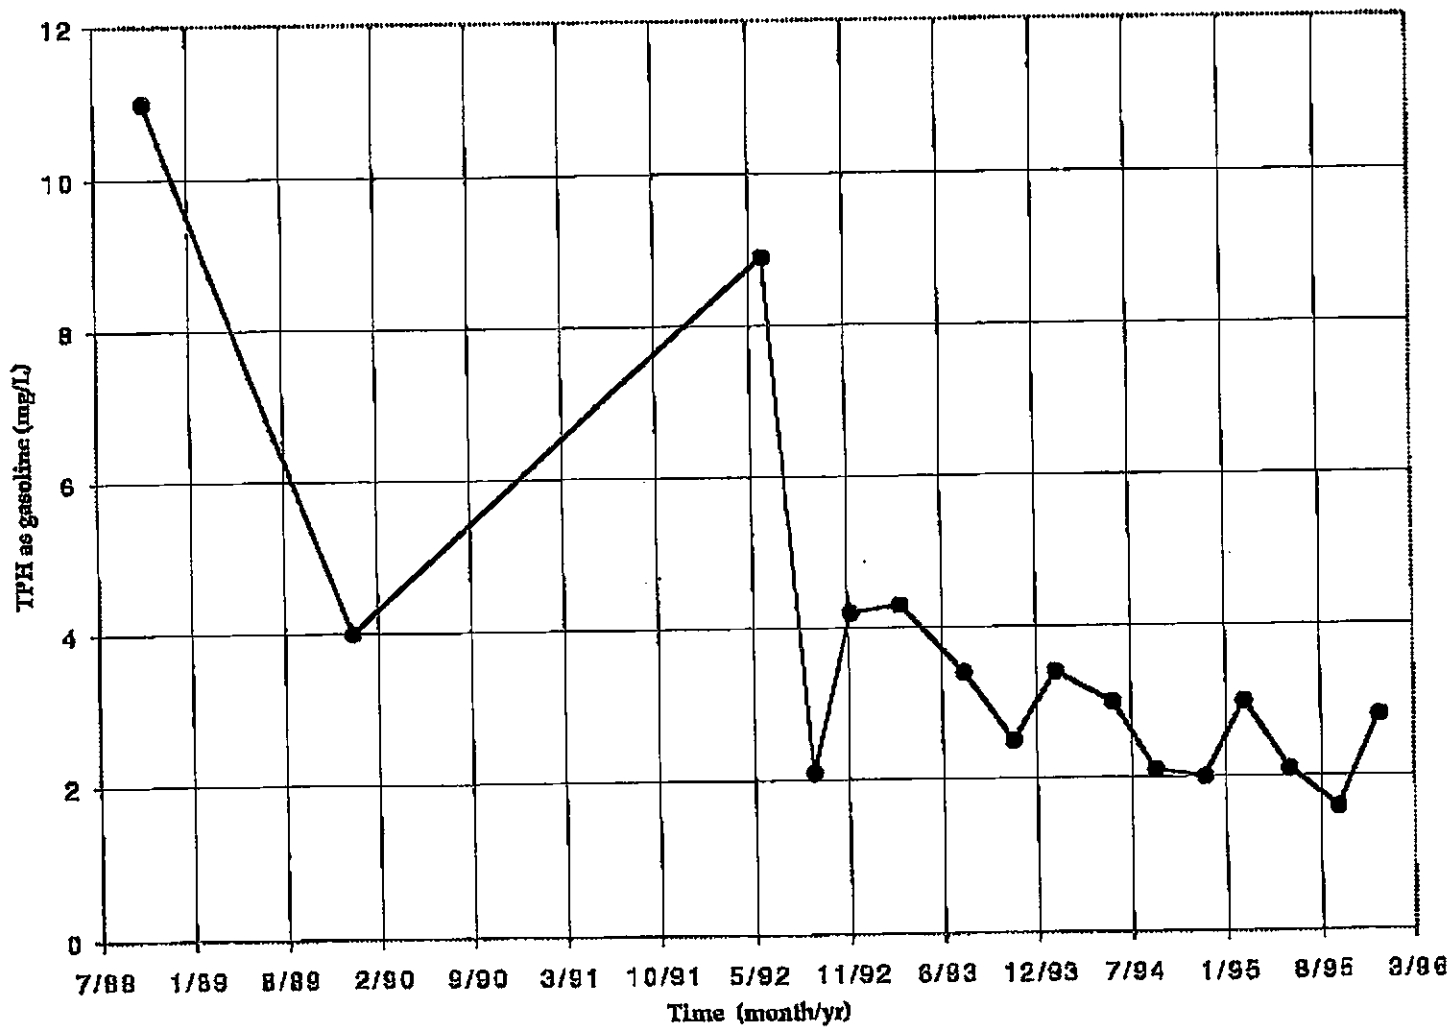

Joel Bruxvoort  
Regional Manager
