Hi Rachel,

I should get out a letter today; however, ACDEH would like the work to be phased in a different order. In order to obtain background vapor concentrations at the adjacent site prior to system activation, the system should be activated after the vapor investigation has collected the proposed data. This should partially document system effectiveness at affecting / mitigating offsite vapor concentrations.

Mark,

Thank you for the follow up. When do you think you can have the letter out? It is my intent to turn the system on next week.

Rachel Green, Development Manager

Rachael and Kyle,

I wanted to contact you to let you know I've had a few delays in getting the letter out (re-discovered I had three case reviews required by the state by Saturday and Monday). I'm out tomorrow, but will get it out on Monday as I've largely cleared the way. Sorry for the delay, but I did not want you thinking it has been forgotten, just delayed.
