Subject: Third-Party review of Human Health Risk aSsessment Work Plan

Dear Mr. Detterman and Ms. Roe:

I have been contracted by PES Environmental, Inc. to review a "Human Health Risk Assessment Work Plan" for site located at 6701-6707 Shellmound Street in Emeryville, California. The Work Plan was prepared by SLR International Corporation of Oakland, California and is dated October 2016. The ultimate objective of my review of the risk assessment work plan is to corroborate that the proposed methodology meets with current U.S. Environmental Protection Agency (USEPA) and California Department of Toxic Substances Control (DTSC) risk assessment guidance. Deviations from established regulatory guidance or potential deficiencies noted will be reported in writing to you as the County's Project Manager.

My tasks for the review are as follows:

- Review the risk assessment work plan and provide comments and recommendations. Comments will be communicated by email to you and the Alameda County Department of Environmental Health (ACDEH).
- Compare risk assessment methodology to established USEPA and DTSC risk assessment guidance.
- Review the adequacy of proposed assumptions, models, parameters and values to be used in the development of environmental and health impact calculations.
- Submit letter-report of findings to you at the ACDEH.

Please let me know if you approve of my review and the proposed scope of work for the review.

Thank you.
