

Shore Log (2195 Center St) St Id 3062

- 1/16/96 Spoke w/ Wayne Akiyama w/ Sierra Re: status of site. Asked him if we might be missing some recent QMB's since last one on file is July 1995 & also was missing gradient info. According to Wayne wells have been surveyed & he believes wells were sampled in 11/95. I told him that once we get 4 Quarters of low to ND & gradient info, we can go for closure. He said he would verify status of site & call me back.
- 3/28/96 Returned call to David Beardsley. He asked Beardsley if we would send info. regarding applic. for case closure.
- 12/12/96 Left msg. for Wayne Akiyama or David Beardsley to call. Want to know status of well destruction. David Beardsley called & said he never rec'd copy of letter requesting well destruc. I gave him a copy.
- 01/13/97 Over D. Beardsley, they are waiting on approval from the State for well destruction.

MEMO to file:

Mike Hilliard (Cal Trans) called to update me on the post ~~remediation~~^{remediation} monitoring that was to have occurred at this site. He said he was still awaiting contact with (unnamed) individual at the consulting firm installing these wells to determine whether they had ever been sampled. Mr. Hilliard said he had checked the wells recently and found that water was in fact present in the casings of all three.

He will update me on the sampling status as soon as he connects with the aforementioned consultant.

Memo to file:

5/25/94

I spoke with Mike Hilliard of Cal Trans today regarding the status of the "dry well" monitoring at the referenced site. He said he had just received responsibility for checking into this issue from Sacto. He indicated he didn't know at this point whether the wells had been monitored or not because the Tetra Tech project manager, Dan Btrack, is on vacation until 6/6/94.

I requested he recontact Tetra Tech as there may be another individual intimate with this project who could provide the information needed to resolve this issue. He said that he would look into it.

MEMO to file:

9/25/92

Phil Skorge of Tetra Tech called today. He said that they've completed the excavation at the site. He indicated the excavation was actually extended to ~ 30' in depth, as contamination seemed fairly consistent to that depth, particularly in a sand "zone" and bedrock fractures / fissures.

I directed him to Zone 7 to obtain the well permits.

MEMO to file:

11-15-90

I spoke today with Mr. Dan Batrack of TetraTech of Pasadena regarding the submittal an additional work plan to further assess the contamination at the site. Because of the delay in getting the "go-ahead" from OSA, I've extended the submittal due date until Dec. 14, 1990.

1-22-91

Mr. Larry McPeck called me today. He works with CalTrans as this region's Maintenance Superintendent. According to Mr. McPeck, OSA has relinquished the continued work at this site to CalTrans.

Further, ~~OSA~~ apparently allowed to expire the contract they had with GeoResource Consultants, who performed the prior work at this site. Mr. McPeck indicated that he learned of this just last week.

Mr. McPeck will be the contact for this site:

Mr. Larry McPeck
Cal Trans UST Division
P.O. Box 3611
Walnut Creek 94958

Mr. McPeck indicated that he will contact me next week to inform me of his success @ discovering the status of contractor availability, money, and a schedule for plan submit.
