

File Review of  
2181 Dunn Rd. Hayward

- UST removal in 9/94 - 6000-gal gasoline UST
- One "hot spot" at pump end of tank  
260 ppm TPHg & traces of E, X, & Pb. This was OE during tank removal.
- No hits in grab gas sample.
- Letter dated 10/28/94 requested a PSA w/in 60-days to include installation of at least one (1) MW w/in 10 feet of UST pit.
- Called BP - not there - best to reach him @ 8 AM daily.

3/7/95

785-5590 fax#. Spoke w/ Clyde "Ed" Vincent re: PSA req't. Sent him a letter w/ 30 day deadline - see letter dtd 3/7/95 (3031-2.395)

4/6/95

Returned Ed Vincent's call (538-0222) regarding a need for extension. He is in the process of selecting a bid for the investigation & is awaiting on a bid from Bruce Hageman. He will be on vacation the next 2 weeks. I told him to fax me a letter requesting an extension.

4/25/95

Left msg w/ Ed Vincent regarding w/p. He said he has hired Hageman-Aguilar, Inc to complete the workplan for review.

5/25/95 Reviewed W/P dtd 5/19/95

- Called Mr. Vincent who indicated he has hired Hageman-Aguilar, Inc. to submit the W/P to us
- W/P proposes 7 hydroponches to delineate gw contamination.
- Spoke w/ Gary Aguilar who suggested they could ~~archive~~ archive gw samples downgradient & only test if needed or could reduce # of hydroponches (e.g. 1, 4, 6, 5). He said he would submit an addendum to Figure 4.
