Shell's site restoration plan dated
5-31-90 within 10 days.

Report dated ~~9-28-90~~ 9-28-90 identify contaminants around the
waste oil tank, and recommended it removed
and the surrounding contaminated soil.
~~9-28-90~~

3-15-91 Meeting with RWQCB, Shell, & Piquetti's. Spoke about
the difference between "Clean up level" and "Remediation
level" (see notes)

* 8-22-91 Waste oil tank removed with 3 new UGT. that
were never hooked up or put into use. No ~~soil~~
results and information whether contaminated
soil in this area has been excavated. ^{Have not rec'd} soil results

10-31-91 report identified oil & grease contamination under the
station building. (up to 1,800 ppm)

Recommendations: a) Additional m.w. needs to be installed off-site
as recommended in report of 1-2-92 in downgradient location
b) investigate / remediation plan for station building area
c) Feasibility study needed to determine remediation level.
d) Risk assessment

5 - On-site M.W.

2 - Off-site M.W.

Tri-Regional Board Recommendations, 10 Aug. 1990
